All the material presented on our web site(s) is either news reporting or information presented for **non-profit study and research**, or has previously been publicly disclosed and implicitly or explicitly been put into the public domain. **Fair Use applies.**

[The Panacea main web site](#)

[Panacea University](#)

A sincere thank you to our new and current subscribers and to all of our supporters for helping to make a difference in the world, each newsletter continues to report more unique achievements than the last due to our subscribers and donors contributing where no others have. It's time to prove this once again. Welcome to The Panacea-BOCAF newsletter #09 dated March 2010.

The support from your ever growing and consolidating community has been directly responsible for the benefits that you are about to read about. This needed ground work is not being done by any other community run organization in the world.

Why Panacea? Case files show that there is past and present faculty neglect, interference due to the government/ corporate profit motive and ignorance of the general public regarding these area(s) of research.

[Free energy technology](#)

[Alternative medicine](#)

[Banking reform](#)

[Sustainable development](#)

There is no other real time operation in effect TODAY to ENSURE that there is public access to this particular education and technology other than the grass movements. **However OUR Panacea's efforts, this is of cause only a "for now" situation.**

In this newsletter , for the third time in a row the trustee's and the community would like to thank "Jules Tresor", "D" and "Rolf" personally for their above than average donations and support.

Due to their direct donations and support, **the last 2 major Panacea objectives mentioned in the last newsletter, the preparations for the GEET School Australia and the clean weather modification technology training have now been achieved. Panacea can now begin the preparations needed to put these benefits back into the community.**

Without Panacea's support both these parties would of had no other way of transferring the technology into public hands. Panacea would like to ask what other community has achieved the un-achievable and to please consider that this is only the start.

Panacea and your newsletter subscription is currently the only organization in effect policing open source and proprietary FREE energy research and development. *Your* Panacea is the only non profit organization intent on creating a non-profit [faculty research and development center](#) for the public to ENSURE that we advance education and create security regarding neglected and unknown suppressed FREE energy and even suppressed medical technologies.

All the subject matter researched and presented on the Panacea Website(s) (in particular FREE energy technology and alternative medicines) have all been subjected to a repeatable pattern and suffered from bureaucracies choosing alternative technologies. This has been shown to be due to these alternative technologies being more financially lucrative.

Irish Company [Steorn](#) has recently proved that Panacea's 10 hour researcher's documentary on FREE energy suppression with our proposed solution is required for an effective real time solution. Steorn have showed that for the last 3 years (and counting) that the establishment, faculties and even public remain ignorant to this FREE energy medium. And further that they have had to "do it themselves" from the grass roots movement. No infrastructure is currently in place to support, grant, study and validate these technologies, not to mention protecting them. **What lessons have we learned? Steorn have had technology ready to go 3 years ago. Why isn't it everywhere?**

We have also shown from our experiences that this education remains stagnated due to faculty's unwillingness to investigate the technology. **Without a SPECIFIC research center to prevent this we can expect the same continued (dumb down) ignorance from the public regarding this matter.**

The open source FREE energy community and many others who deal with additional [social reform issues](#) are out there to PARTICIPATE. All however lack adequate resources, **A COMPLETE PUBLIC FACE (being able to make the majority of the public awake to these issues)** and a centralized PUBLIC hub to better support and manage their objectives to capacity. But the minority community is out there and is forever growing. We must and all can manage our resources and efforts COLLECTIVLY and effectively progress.

Waking the general people up to all of these issues and technologies is an ESSENTIAL start, a centralized hub in the public eye for this task is Panacea's goal and the community can only work at its best when effectively consolidated. We have to start somewhere. And YOU are. This applied education is needed to create social reform.

Taking neglected, suppressed and unknown FREE energy devices to the people first by our proposed granted non profit research center concept is needed to address the security issue, build consumer awareness and demand not to mention address the faculties' neglect of this area of research. The majority of the public remain unaware of this genre of FREE energy engineering and other [sustainable development](#) including [monetary reform education](#) which is presented on the Panacea site.

Panacea's proposed educational institute is currently the only one intent on teaching ALL of this specific education to the public.

YOUR nonprofit organization continues to work with ALL engineers (and together with other research groups) plus research all FREE energy technologies and sustainable development which can do public benefit, save the tax payer money and advance education. However our goal is to take it MAINSTREAM.

Each Panacea objective is helping create the ground work needed for this task. **Thank you for your continued support and helping us to perform our nonprofit public service. -The trustee's of Panacea-BOCAF.**

Main page news

Panacea-BOCAF hosts the GEET School Australia

Coming soon in 2010. The [GEET/SPAD/Ecopra](#) technologies are perhaps one of the most promising pollution cutting and energy saving modifications we have seen so far. The inventor Paul Pantone and his Son David Pantone have had a long and hard road trying to get the GEET technology out to capacity. We are pleased to announce that the GEET School Australia can now be hosted NON profit by Panacea. Preparations are underway- All revenue will be put back into the research of OPEN SOURCE FREE ENERGY technology. The following GEET School Australia page is still under construction.

Hosted by [Panacea-BOCAF](#) Panacea is a nonprofit educational organization dealing with the training, consultation, protection and research into suppressed and alternative FREE energy technology. Together with Panacea's support, the GEET International Institute Australia aims to advance education with the GEETS superior energy saving and pollution cutting capacity. Currently the GEET technology is non government funded. Can you help? [Contact us](#).

<http://www.panaceauniversity.org/GEET/>

The following images were taken of David Pantone whilst he was working during his visit to Panacea's head office in Australia. Thanks to sponsorship David arrived to help build, transfer the curricular and help train Panacea for the GEET school preparations.

David using the [Roto- Verter technology](#)

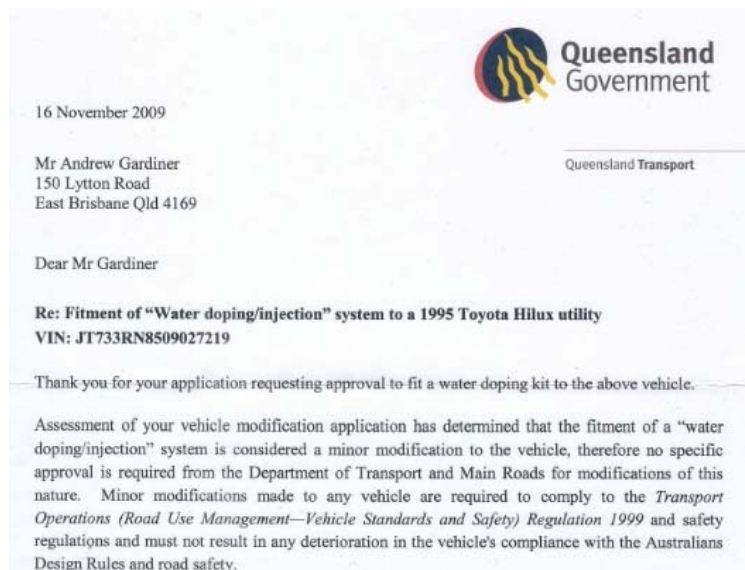

David and Panacea volunteer Phillip Higson - Machined GEET rods ready for testing

Panacea hosting the GEET School Australia has many advantages. We have the capacity to attract many more engineers who can help aid the open source FREE energy genre and help students replicate the GEET. We will also be able to and help train NEW engineers into neglected and suppressed FREE energy technologies.

Engineers who come through the GEET School will get more than a GEET lesson. We are working every week to get the GEET devices replicated, understood and easily retro fitted and will have them under open house for all (even non students).

Panacea has already done the ground work to get the GEET accepted on the Australian roads; this template can be used by other countries. We plan to help get a gas chromatographic test done to show the world what the GEET can do. **When fully realized and applied primarily the GEET pollution cutting attributes are essentially a health issue and can save many lives by improving your health.**

The GEET modification has been approved for on road vehicles in Australia

Any one wishing to get help in presenting the GEET to their government or faculty for this task please [contact us](#) we are here to help.

Also the city council in Brisbane Australia (and potentially Australia wide) will be evaluating the pollution cutting and energy saving attributes of the GEET (And all the retrofitting modifications Panacea is working with) thanks to the non profit organization contacting them and setting it up. Soon as the GEET technology is finished by Panacea this process can begin immediately.

Package sent to parliament

By the city council's adaptation of the GEET or any retro fitting modification this in turn could save the tax payer a lot of money and be a model for other countries to tackle pollution and improve the health of their residents. This was only able to happen thanks to Panacea's efforts and getting the GEET school Australia started here was mandatory for this objective.

If you reside in Australia- Please [contact Panacea](#) for any interest in attending the Australian GEET School, all revenue is put back into the non profit organization. Other schools are planned please check the [Geet.nl](#) site for other locations.

<http://panacea-bocaf.org/geet.htm>

Weather modification replication process under way

Mark 2 spider –Taken from the Video
“Etheric weather engineering on the high seas”.

Thanks to YOUR donations, Panacea has been able to train our own pilot for [etheric airborne weather engineering work](#), start to replicate equipment and have almost gathered enough funds in reserve to help fly Trevor Constable here to train Panacea.

RECEIPT

Carpenter Air Pty Ltd Hangar 105 McNaught Road CABOOLTURE Airfield QLD 4510	CR003633 11/02/2010

Received from PANACEA UNIVERSITY
The sum of Six hundred & fifteen dollars
_____ cents
Being for AFR + aircraft hire

\$ 615.00 Kelley
Signature

The technology will be protected and held in a nonprofit public trust and SECURE for the next generation. Panacea will not be charging farmers to relieve misery from drought. Previously it cost one million dollars to get this weather engineering service done, not any more thanks to your donations.

A quick video of Trevor Constable's technology and Panacea's government records

New- [Trevor James Constable's Airborne and Sea Operations](#)

Prior Complete - [Panacea Cloud Buster Production](#)

Please help and forward this educational video material to your Member of Parliament and university, we are all needed to help apply this EDUCATION. **A DVD of both productions can be obtained from directly from us for this purpose; if you can do this please [contact us](#) for your DVD.**

A new Panacea video production containing a complete background of Trevor's accomplishments and proven rain engineering work is currently being filmed and edited as you read this. The new production will be entitled "Trevor James Constable's Etheric Weather Engineering".

Panacea's Cloud Buster Testing

Without Trevor Training Panacea, the general public would continue to be ignorant of this clean non chemical weather engineering process, this method has been working since as far back as the 1950's. **This is the cheapest for the tax payer to implement to prevent drought, manage bush fires and hurricanes.**

Trevor's long time associate George Wu is now bankrupt and cannot continue the service. **Individuals like Trevor James Constable and James Demeo have being doing a community public service to mankind and have saved serious situations as a result of using this technology; these individuals have done so without any endorsement and have had to incur their own personal costs.**

The Public remain ignorant of this technology; however Panacea will show the public the technology working this year. As a result the public will have incentive to police the faculties and governments to sponsor and use this technology to save the tax payer money. More information on these plans and how you can help can be [found here](#).

The construction of Trevor Constable's waterless Etheric weather engineering designs are now underway thanks to Trevor and your donations. After construction and training the pilot, Panacea has almost gathered enough donations to sponsor Trevor to come over here to train Panacea, we are barely keeping up with it all, after the construction and the flight training we may struggle, but this struggle is a worthy one, **think of the lives we can save with this technology.**

After Panacea replicates the technology we can work towards a grant case to permanently operate it, but our replication is needed for ground work (plus flying Trevor here to help train Panacea) is essential for this.

If you can help us, however slightly please consider **WE cannot survive on a shoe string budget, if you can assist us in any way shape or form [please help and donate](#).**

New Panacea video production- David Pantone visits Panacea

David Pantone is the son of Paul Pantone - the inventor of the GEET technology. During David's visit Panacea made the most of it and completed filming an educational "Mini" documentary **with David thanking the grass roots movement, and with Panacea explaining all the open source FREE energy technologies.**

Taken from the Mini Doc:
David taking a serious moment to thank our community

The contents of this documentary will have many examples and helpful info to help spread the word about the FREE ENERGY movement and gain support for it, waking

more people up is essential. Video productions have been proven to help this task. This production is expected to be completed in the next 3 months.

Panacea Research and Development projects

New Retrofitting modifications

Andrew Gardiner – Panacea co founder and head engineer
testing the new [Gadgetman Groove](#) fuel saver and pollution cutter

Panacea is currently in the process of updating the vehicle fuel saving modifications PDF which will show all the retro fitting modifications that can relieve an economic burden and reduce pollution. Most of them will be directly validated and tested by us, and where possible shown open source.

One of the Modifications we are testing is the NEW Gadgetman Groove (pictured above). This technology will eventually be open source thanks to the inventor's altruism. This system is an easy non mechanical and maintenance free modification. Soon Panacea will be testing the [HH2 hydroxy system](#). This unique hydroxy system separates the hydrogen and oxygen and does not require you to modify the cars on board computer, perfectly legal.

Although the HH2 system is not open source technology, it is one potential hydroxy system which can pave the way for governments to use the technology. This system has CARB approval (a standard recognized worldwide) and currently allows a tax deduction in the USA.

To his credit, Derek, the founder of the HH2 system has pledged to reduce its cost after their initial investment has been recovered. **This in itself is a great victory from our influence to help SPREAD THE TECHNOLOGY to capacity and for public health.**

It is our aim to use this example (and our own press and public testing) to help get a similar rebates or tax deductions from other retro fitting modifications and make it cheaper for the public to get them fitted, save energy and reduce pollution (public health benefits).

Specially treated Stainless steel plates create strange effects

Panacea has heard of some strange devices in our time, but seeing one is quite different. One of the retro fitting modifications and new video productions we are doing involves our own validation of this new fuel saving and pollution cutting device.

The Leon Fuel saver

Not yet open source, but worthy of study none the less, this has already been proven and dyno tested, and shown to us by a reputable member of Panacea, this device is like no other fuel saver. The inventor Noel describes the function of this device as balancing the ions and eliminating the electronic friction in the engine, allowing you more oxygen and easier burning of the fuel. Plus rust proofing applications. This is the strangest devices we have ever seen.

The device is placed where ever friction is detected in the vehicle, by magnetic and other instruments. Fuel gains vary from car to car, up to 30+% plus have been shown on a variety of cars, **plus a dyno has shown 97% reduction of hydrocarbons at idle - nothing to take lightly.**

Installed on one of Panacea's affiliated vehicles

This opens up a whole new genre of engineering, the device proves that the alternator fields and electronic friction affects not only people but fuel economy and pollution, electric cars would greatly benefit. This device needs faculty study.

Trustee – Andrew smelling the exhaust (no pollution: idle - 3000RPM)

Panacea will install and do our own dyno testing and production on this device, including showing some of the political and economic conditions associated with it, plus how you can help. Panacea also knows the Brisbane Australia installer, no other ones are known at this time, if you are in Brisbane [contact us](#).

Panacea plans to open a local retrofitting garage

Pictured below is one of Panacea's GEET supplementary diesel systems under construction. This garage will be for open source training also to help get all the retrofitted modifications known to the public and government. **All this was done and so far continues to be done on no budget.**

Test Engine for the supplementary GEET for training others

Supplementary reactor for training

All our retrofitting modifications can be tested, presented and TRAINED here at this garage; this can then be used as a template to help spread the technology to other garages. These demos will be made free to anyone wishing to benefit and help open other garages.

Modification of the Rosemary Ainslie heating circuit

Panacea's Circuit

We are committed to open source FREE energy education and advancing FREE energy education in the mainstream faculties. This process will change the text books and is unique in efficiency. This heater circuit is remarkable; Panacea has posted our replication progress in our online university course document. Panacea collaborated with inventor Rose to help write an Institute of electrical engineering paper which will be a great victory for the open source community.

The IEEE paper has been completed and a copy is available in our online university, you can spread this to your local university to help advance education. Special thanks to Rose for her open source efforts, plus to open source engineers Glen, Jib and Harvey.

Open source engineers collaborating to write this paper is the first attempt in getting a FREE energy device accepted into the mainstream curricular in history - **BY THE OPEN SOURCE COMMUNITY**. The IEEE response to the paper was that it was more suited for a physics journal. At this time Rose has her own magnetic field model which must be explored and presented. This physics paper must be written and submitted.

It's the educational part along with the applications that must advance education. A simple efficient heater on the market does not open up the genre of FREE energy engineering at the faculty level. Rose is a pioneer and has our respect.

Separately, open source engineers Harvey and Glen have made a modification of the circuit (COP 4) and explain it in their own way, these experiments and technical

learning is expected to continue along with Panacea's replications. We are also here to help NON profit with Rose's physics paper should she need us.

We intend to replicate the open source circuit and do more educational "tours" with the device locally here. Full replication details and this paper which you can forward to your local university have been backed up in the [Panacea Online University course document](#).

New Panacea video production coming soon - Dirty Electricity

Dirty Electricity (DE) affecting the body is valid scientific fact as shown in the mandate for the citizens of Kazakhstan that protects them against DE. (Filters are backed by scientific evidence which has been presented to the World Health Organization.)

This is another reason for power factor correction (even a simple capacitor plug for the wall), Panacea is doing a video production on dirty electricity as part of building the case for the alternative medicine research part of the nonprofit org's proposed granted nonprofit research and development center.

A volunteer has shown Panacea one of these meters:

<http://www.stetzerelectric.com/researchPaper/list>

The only way we are told to measure shielding material with reasonable certainty is by Bio Feedback (medical sensors on the human body) and via kinesiology.

Panacea will be testing devices with

<http://www.orgoneffectsaustralia.com/geoclense.html>

He is of the opinion that this medical aspect (Bio feedback testing and measuring the positive ion as opposed to negative) should marry with the industry Gauss measurement standard to say your home is "safe a brilliant point to emphasize.

More on dirty electricity and filters- <http://www.silentfields.com/>

Always Refresh Pages on the BOCAF site

PLEASE ALWAYS REFRESH THE PAGES (by pressing the F5 key) WHEN VISITING THE PANACEA SITE, MISTAKES ARE BEING CORRECTED AND NEW CONTENT IS BEING ADDED. Please contact us if you see any mistakes. We appreciate any help and feedback.

Panacea needs you and donations!

WE cannot survive on a shoe string budget, if you can assist us in any way shape or form [please donate](#).

The proceeds derived from materials offered to the non profit organization are carefully utilized toward various projects to bring about a better future for all. Please help us deliver suppressed and alternative free energy technologies to the public by making a donation.

There are many ways to render assistance towards the reaching of the goals of Panacea-BOCAF. You may, for instance, contribute any ideas or input - let us know of a new website or a replicable project or any such thing. You can also become a volunteer or even offer a donation. For those of you who are not able to use PayPal, it is possible to assist the foundation by mailing any form of assistance to the following address:

Care of Panacea-BOCAF
150 Lytton RD East Brisbane QLD 4169
Australia

www.panacea-bocaf.org/pleasedonate.htm

If you are involved in or can help with any of the subject matter presented on [our projects page](#), please contact us for collaborative work. Only united can we all work effectively to stop subjugation. Also we are helping make real changes by [public activism](#). Please sign our petitions; it's as easy as name email and country.

A reminder for Security

To all our new subscribers- It is Important note that should your news letter not show up and / or the Panacea web site ever be taken down, or anything suspicious like a non response from the nonprofit organization ever occurs- Please email from the link below (save this link). Along with the following text template provided. **Please email the Panacea web site BEFORE hand to double check.**

Queensland Police Service Internet Web Site - <http://www.police.qld.gov.au>

Hello, I am a news letter subscriber of a nonprofit organization at Panacea-bocaf.org. I am sending this email in order to inform you that the nonprofit organization which is engaged in research and development into alternative and suppressed FREE energy technology may have been targeted and or intimidated. Their news letter has not turned up and or there is no response from their web site. As a news letter subscriber this email has been sent as a precaution, I am acting as a deterrent and as a "watch dog" of their operations. Newsletter subscribers have been informed that the nonprofit organization has visited your police station to go on record detailing that they are perusing this research and further that intimidation or interference may possibly occur. Plus they have reported that previous intimidation has occurred to their registered engineers. Therefore we the news letter subscribers are advised that if anything suspicious arises, for the news letter subscriber to send you this concerned email. Please look into the situation immediately. Regards...

[Send the Email to this link below - Save this link!](http://www.police.qld.gov.au/Forms/contact.asp)
<http://www.police.qld.gov.au/Forms/contact.asp>

We are happy to report that no suspicious behavior has happened to your nonprofit organization or to any of our open source engineers despite us being involved in this genre of research that threatens the "status quo". The Panacea's trustees would like to personally congratulate you for playing a continued successful security role with your news letter subscription. **Thank you for your critically needed support!** – We look forward to reporting to you in the next newsletter **which is due in July 2010.**

Please check our [news section](#) on the Panacea-BOCAF site for new video productions coming soon. The nonprofit organization's volunteers are proud to work for the public and look forward to reporting our public service to you soon! **Thank you again for your subscription.**

Sincerely,

The trustee's of Panacea-BOCAF.
