

Panacea is a registered non-profit organization, dedicated to educational study and research. All copyrights belong to their owners. All the material presented on the Panacea web site is either news reporting or information presented for **non-profit study and research**. All this information has previously been publicly disclosed and implicitly been put into the public domain. **Fair Use applies.**

www.panacea-bocaf.org
www.panaceauniversity.org

Our sincerest sympathies go out to all the victims suffering from the recent events unfolding on our precious planet. 2011 has already been one of the [craziest years](#) since World War 2. Revolutions have swept across the Middle East, the United States has gotten involved in the civil war in Libya, Europe is on the verge of a financial meltdown and the U.S. dollar is dying. None of this is good news for global food production either.

We are all in this together. Higher education exists which can truly make our world safer, secure and sustainable. WE need more public exposure of this area. Panacea is progressively consolidating education for harm reduction and self sufficiency. Today corporations, conglomerates, and/or government entities with private components, control the direction and governance of a country, including carrying out economic planning notwithstanding the 'free market' label. Given the sheer amount of dis-info and profit margin- **Self education and self care is a fundamental security in life.**

With open source and other educational solutions there is more we can do for New Zealand, Japan, Haiti and ourselves. We will address these solutions in this newsletter. Getting this particular NEGLECTED and suppressed education "out there" is where the real skills are. Panacea's function is not one of a normal organization; it is one for this SPECIFIC task. It is Panacea's sincere friends comprising our trustee's, donators, and subscribers who make up this unique skill. Together we are progressively taking one step closer to reaching these goals through our collective truth movement.

It is our responsibility to use any knowledge we have available to ensure that where possible any future misfortunes are avoided. The education is present to prove we can rebuild NZ, Japan and Haiti with higher education for harm reduction and self sufficiency. This includes alternative FREE energy technology and [monolithic domes](#), these structures are earthquake and hurricane proof. **However no mainstream relief aid project is doing this or has this caliber of education. Mainstream faculties do not teach this HARM REDUCTION education in their curricula. Industry cannot profit the same way from these methods.** One example is in using Monolithic domes, a solution which insurance policies could also take on board. This education is practical in disaster relief rebuilds.

A Monolithic Dome Design- [Source](#)

The Earthship volunteers help with design protocols that utilize earthquake proof domes plus renewable and recycled materials. Earthship designs are a perfect example of achieving these educational goals. However, like other educational institutes with higher education, they cannot educate this capacity alone. Normally a faculty would be consolidating all of this knowledge for public benefit; however this is not the case. **A policing faculty of this nature is a goal of your nonprofit organization.** WE intend to begin the consolidation of ALL this neglected higher education into such a faculty.

Earthships remain neglected as do others education, these design solutions contain their own sewage, are cheap to build and enable food to be grown locally. **If the mainstream aid budget given to Haiti was utilized for these design solutions most of the country would now be protected and closer to self sufficiency. This higher education can be improved still.**

Earthquake proof dome - Earthship Haiti educational rebuild project

The new [Panacea Earthship page](#) is one of many new pages coming to your website to help train others. The Panacea online university is offering the instructional Earthship building resources for EVALUATION and study. To qualify for this material you can be a builder, academic or researcher INTENT on starting these community or housing projects and supporting Earthship. Note- these resources cannot be legally "lent out", sold, distributed or used for any other purpose. Anyone who is able to make a go of this art of living a carbon zero lifestyle and can support Earthship can [contact us](#) to discuss collaboration.

This year Panacea we will be introducing our own OPEN SOURCE renewable Hempcrete building course to aid Eco housing and the Earthship goals. Our Earthship project will be done locally and involve using our future licensed industrial hemp from one of our donated farms.

A house made of HempCrete

Hemp can be grown locally in communities to produce 29,000 products OF THEIR OWN. This method can service the Earthship self sufficiency concept well. The educational aspect of industrial HEMP can also provide food and **many other**

resources for countries but is currently not taught to capacity. Earthships were taught in Haiti to show them self sufficiency ideas. Hemp building is a needed new up and coming FREE and open source course by Panacea to help.

The next new webpage we are pleased to present is part of our Free energy research section. The [Summary of commercial free energy devices](#) presents the needed solutions to help protect free new energy devices, build consumer awareness and demand and help them with real time progress.

Despite these PROVEN commercially available FREE energy alternatives to dangerous gas fracturing and oil drilling, the following quote remains to be unnecessarily conditioning the public.

"Here is the challenge we have: We don't yet have the technological breakthroughs that can completely replace fossil fuels , so for the next ten years or 20 years we are still going to be using oil we are still going to be using coal we are still going to be using natural gas , we are still going to be using traditional sources to fuel our cars heat our homes run our big power plants ETC , unless someone here invents something tomorrow that would be very helpful and if you have it, let me know"
- Obama. Can you help change this? Contact Panacea.

The new Panacea webpage contains the technology capable of replacing Japan's dangerous nuclear reactors. **Japan's nuclear reactors remain on the Earth's fault lines which are destined to be altered in the near future. The coast of Japan is also a major tsunami risk.**

Black Light Power's commercially available free energy system. Licenses for a thermal power unit, Hydrogen home power and motive power are currently offered. They already have around 8 Giga watts of power already licensed out.

The terrible events in Japan may well cast doubt on the safety of nuclear power generation. Renewable sources such as tidal power and wind can make some contribution as a substitute for nuclear power. However there are three neglected commercially available FREE energy devices which can completely replace all of them. **With any one of these 3 devices Japan can/must replace ALL of their dangerous nuclear power reactors with cleaner renewable energy. But who is policing this?**

There have been both mainstream and “non mainstream” technology solutions donated to help RE BUILD Haiti and Japan. So why not FREE energy technology? **Panacea will be appealing and writing to all commercially available free energy companies to use Japan’s unfortunate tragedy to help educate the world.**

We must encourage companies with commercially available free energy devices like Hidro, Energy By Motion, and Black Light Power to utilize this opportunity for EXPOSURE and to help them inform the world that toxic energy sources can be replaced TODAY with clean and renewable energy systems.

The next new Panacea webpage covers one of these technology solutions.

[The Hidro Free energy system](#)

The Hidro device- A commercially available free energy system

Panacea began with a support article on Hidro, we were also planning to produce our own video production and work with an Australian green festival to support their work. To our amazement a lovely and loyal Hidro assistant contacted us and invited us to witness a working demo of the Hidro device. After the initial shock and excitement, Panacea met with Inventor James Kwok and Hidro’s assistant Katrina whom are both nothing short than spectacular. With a warm welcome and unbelievable hospitality we were shown the ANSWER to a clean energy future TODAY.

Panacea has been working for many years in the area of policing free energy technology with the goals of erecting specific infrastructure for this purpose. It’s one thing to do R & D, educational videos and more, but to actually get to see a live working device with children present left two of the Panacea Trustee’s mesmerized. Inventor James Kwok has given the children of the word the best gift -A clean energy FUTURE.

Hidro are hard workers and “one of us”, they are on the same level as the truth movements. This fact inspired Panacea more than ever. By witnessing the Hidro technology self run proved to us that freedom from fossil fuel subjugation is possible TODAY and not tomorrow. **The Hidro device was confirmed by Panacea to self run.** The Panacea engineer’s qualifications can be provided upon request. This is an open energy system using nature’s forces. Instead of using wind, solar or wave, it uses buoyancy, gravity, gas density and hydrostatic pressure gradients to ascend and descend. The small battery input ensures that a continuous cycle is maintained, but it is nature’s forces that give Hidro the capacity to “self run” and produce 30% excess continuous power.

A View to the FUTURE – Clean energy

The one kW light load pictured left in the above photo needs a mere 15 amps at 24 volts to self sustain Hidro’s continuous power output cycle. That is 360 watts in and 1kW out. Nature provides the rest. This tower has a 20 kW capacity. Hidro want this technology for everyone. They are some of the most down to earth people we have met in the “Free energy scene”. They are well aware of the criminal elements in the world. Waking people up to Hidro’s clean energy future requires public participation; they deserve our love and support, they cannot do this alone.

The first Hidro video appeared back in 2008. Hidro has since had a booth displayed at the 2009 United Nations Climate Change Conference in Copenhagen. They have also had their working FREE energy principle mentioned by the IEEE. Even a [University in Australia has worked with Hidro](#) and is now interested in improving their FREE energy principle. Panacea has recently done an [interview with PES](#), covering our visit to Hidro. **We wish to give a special thanks to Sterling Allan of PES for working with Panacea and helping to launch our educational drive for Hidro.**

Despite all these efforts Hidro have remained “idle”, this device carries a 3.75 million dollar price tag per MW; HOWEVER, Hidro can offer the nonprofit organization a 50kW version OF CONTINUOUS POWER for only 200 thousand dollars. **THIS IS A PROVEN AND INSTANT ANSWER TO IMMEDIATELY STOPPING DANGEROUS GAS FRACTURING, NUCLEAR POWER AND FURTHER DRILLING FOR OIL.** Panacea feels that sponsorship for a 50kW unit to show the WORKING PRINCIPLE to the majority of the public can prevent this device from remaining stagnant.

Deploying Hidro means CHEAPER electricity. This technology has been designed to co-exist with the current energy infrastructure to avoid transmission losses, add capacity to the energy grid and to achieve carbon neutral generation. They can be constructed anywhere in the world, ideally in 1 Mega-Watt modules. These modules can provide continuous electricity for 1300 homes adjoining existing substations capable of saving up to 47% of retail electricity bills and in non-grid regions as a Distributed Power System. Hidro generators are not affected by fluctuations in the weather and each 1 Mega-watt plant will reduce CO2 emissions equivalent to taking 7,968 cars off the road per year (versus current power infrastructure).

The 20 kW Hidro system evaluated by both Queensland University and Panacea

Despite these facts, there is no one policing politicians to deploy Hidro and they remain opting for dangerous gas hydraulic fracturing. Anyone can review the dangers of hydraulic gas fracturing by watching the [Gasland documentary](#). Natural gas enjoys broad political support – including White House backing – due to its domestic abundance. Gas fracturing is a big problem not just for the USA but for the world. It has taken independent activist film makers to police the neglect and

educate the public. Recently Dr. Anthony of Cornell University has helped to produce a report to show Gas fracturing produces more pollution than fossil fuels.

The world remains ignorant of HIDRO AS AN INSTANT SOLUTION TO STOP GAS FRACTURING. **Politicians are on record knowing about Hidro but are not telling you about it as an alternative.** Panacea recently spoke on an educational panel at an activist film presentation to help spread the word of Hidro as the alternative to dangerous gas drilling.

Gasland screening

Panacea will be creating a digital lobbying resource for the public to use. This will enable you to easily send the request for cheaper and carbon negative electricity to your politician. They will then be on record about knowing that Hidro is a solution to pollution and is cheaper electricity.

The public need to use the reality of the Hidro technology to urge their representatives to oppose gas fracking and other environmentally harmful technologies. There is now an alternative to such technologies, which can be pursued by any who truthfully care about the environment, our health, the economy, and the future of our civilization.

Solar credits are already provided by governments to help change over to cleaner and more renewable energy. A solar station uses precious metals; transmission loses plus additionally requires gensets for down times. None of these can compare to the Hidro solution. Hidro can also CREATE many LOCAL jobs in manufacturing for ANY country adapting which adopts this technology. Australians and others MUST NOW COMPARE their renewable energy plans and budget to the practicality of using Hidro.

WE can help. Panacea is launching an educational drive to show ALL these benefits with the device. Panacea BOCAF is now attempting to find sponsorship to purchase sustainable technologies like Hidro (estimated cost is 200 thousand dollars). Panacea will then apply the device to educate the public and use it in an agricultural open source project to showcase this technology in operation. **The focus**

will be to illustrate how such a technology can provide many benefits, including allowing communities to become self sufficient.

A scene from Panacea's up and coming educational film on Hidro. Hidro is pictured in the background

In such a PUBLIC demonstration, visitors and members of the community would see how the device is providing constant power to the selected community without being connected to the grid. Initially, the actual inner workings of the device would not be displayed. This would be in order to protect the confidentiality of several custom designed patent pending components. It is possible this will not always be the case, and eventually more details could be revealed without jeopardizing intellectual property.

Note: Hidro+ does not partake in the process of fund raising and its proceeds and/or allocations. Panacea is an independent, evidence-based and non-aligned, non-profit institute. Panacea is not affiliated or connected with Hidro in any way. The purchase of the Hidro system by Panacea would not be for a one-time demo, but for an on-going educational campaign. During the campaign the benefits of such environmentally friendly energy sources would be exclaimed, while individuals and communities would reap benefits from the power it produced.

Panacea-BOCAF's campaign to get started and financed is minimal. Billions of

dollars are spent each year giving subsidies to gas fracking research, so called "clean coal" and other environmentally unfriendly technologies. A tiny, miniscule fraction of that could finance this drive many times over. The money is out there. Do you know someone who can make a donation towards this effort? Are you considering making a donation? Please feel free to [contact](#) Panacea - BOCAF.

You can still help to raise funds by spreading the word to see if anyone can help and sponsor this sustainable technologies educational program. Please don't underestimate this valuable aid. It helps even to click adds on the Panacea site and check out what they have to offer.

Panacea is also producing a Hidro educational Video production covering these fund raising goals, Hidro's benefits and our visit to Hidro. Please check our [news section](#) in the next month.

One of Panacea's Trustees's helping Hidro with their own production

In the mean time we urge the WORLD'S residents prepare to say safe from Japans radiation risks, stock up on solutions to help detox and protect the body. People with Orgone energy technology need to disable them; the radiation risks are far too great and will be amplified by such a technology.

Potassium Iodine is selling out

A popular choice is [Potassium Iodide \(KI\) for protection](#) from radioactive Iodine-131 is 130 Milligrams (mg not mcg) which is 76.5% pure (elemental) iodine. Small iodine drops with kelp can also do this job along with vitamin C aids. Please check this video for further details. <http://www.youtube.com/watch?v=B3xVgTXje9Q>

You can also start eating foods like the following dish Panacea created. The following contains a kale and kelp salad with Chia seeds, Miso and seafood soup. Make sure ALL ARE MADE FROM ORGANIC INGREDIENTS, be careful buying ingredients from Japan in the next few years.

Educational organic nutrition provided by Panacea

Sea noodles and other nutritious raw foods can help, aside from the free energy devices we mentioned being a suitable replacement for Japan's disaster. **Research has shown that [Brown's Gas can efficiently neutralize radioactive waste through transmutation](#) right at the reactor, thus removing the need for transportation or storage of nuclear waste.** An attempt was made to show this to the US Department

of Energy. This however resulted in insufficient support and procedure to support the data. Dan Haley from New York investigated the lack of response after the US Department of Energy observed such a demonstration of transmutation. **The report shows that a collaborative scientific effort is still needed to present the full data and help this case. If you can assist this needed effort, please [Contact Panacea](#)** . This is another reason why the public needs our own research institute!

- [Technical study showing browns gas treating radioactive material.](#)

This hydroxy research needs a grant backed research and development environment to flourish and will be submitted into faculty study in the [proposed granted NON PROFIT Panacea research and development center.](#)

There is much more that needs to be done and which can be done. This is a task that Panacea is undertaking. Every transition in human history begun with the realization "We have to start somewhere". Most of these modern advances begun by a single person or community consolidating to change what were thought to be INFERIOR and UNNECESSARY. Today the modern corporate profit system is such a scenario. **Fundamental to all their successful efforts was education.** It is for this very reason that your nonprofit organization is an educational institute.

The education system, corporate industries choice of materials, financial system and their very design system have created the artificial need for non renewable resources through a debt based money/competition based labor system. The alternatives to this counterproductive system are not regulated or educated in the mainstream curricula. It remains an educational crisis.

The neglects and suppressed alternative design systems prove that the many branches of related politics help regulate this non renewable industry into being and are not going to change over any time soon. **These are outdated and useless modes of social operation.**

Panacea's sustainable development model is designed to **educate** the PUBLIC to police the politicians on this issue. The following are some of the systems which replace the present outdated corporative, social, economic and environmental destructive processes.

Renewable industry can only be made from using [Industrial hemp](#). This material replaces practically all of the present unsustainable industry with most carbon neutral results. This includes the capacity to replace plastic, which remains a big problem for eco systems. 29,000 products cannot be made any more renewable or sustainable other than by using industrial HEMP.

All the basic necessities of life like: Food—seeds, oil, flour, medicine—salves, anti-nausea, toiletries—soap, shampoo, lotion, textiles—clothing, towels, bedding, canvas, household products—carpet, detergent, paint, toys, industrial products—paper, building materials including concrete, insulation, fuel, car parts cannot be produced with any more of a carbon negative result. **A country growing and using this resource would be self sufficient of petroleum and other industries. You will not find these methods in any of the present curricula. Politicians are not mentioning it either.**

Hemp products

There is other neglected education out there which is preventing sustainable development. Health education is one of them. Organic raw whole food medicines have been proven to have the capacity to replace the majority of pharmaceutical drugs plus prevent disease including cancer.

The finical system is another culprit. Community regional currency replaces the debt and credit system and stabilizes the economy. We know that FREE energy (creates self sufficiency in home and transport energy leading to cheap local food production) and alternative medicines like the suppressed cancer cures make the

debt based system obsolete. **However they all have never been educated to capacity. No one other than Panacea is intent on policing ALL of them.**

Panacea is the only educational institution intent providing these solutions in an open source environment and creating the educational infrastructure needed to police these solutions. This year will be a very busy one for your nonprofit organization our good friends and will need your help with add sense clicking or donations to maintain our help. Panacea is now compiling a complete OPEN SOURCE educational course on how to progressively change over to self sufficiency. The Panacea self sufficient course will be structured with the widest range of options and free information which no other organization is capable of producing. The stages of this course will combine integrated technology solutions spanning a wide range of design options for urban settings, rural and to the third world.

Damanhur – A sustainable eco village in Italy using a stable monetary system

The above example is of Damanhur - a sovereign society in Italy using regional currency. Their monetary system is a form of economy based on ethical values of co-operation and solidarity. It will not suffer inflation or a financial crash and all the benefits remain in the community! **Regional currency** has long provided economic stability even in the 1930's great depression. However it is not educated. This is one of the areas in self sufficiency which Panacea will include in this educational resource.

Neglected regional currency (economic stability), alternative medicine (including cancer cures and raw food nutrition), suppressed free energy (not including solar, tidal or wind) and renewable industry through hemp production have never been consolidated to produce a course for creating self sufficient communities. Yet it is only these design systems that can produce these results. Panacea is the only non profit organization we know of integrating these solutions to help real time progress.

The next module in our self sufficient course will be a progressive open source urban farming course to educate city residents with SOLUTIONS for local food co-ops and show them how to utilize their unused space to relieve an economic burden and create food security. This will also help improve their health and educate themselves with organic raw whole food nutrition.

Currently we must prepare for food security. Who says so? Well ask FEMA and the World Bank. [20 Signs That A Horrific Global Food Crisis Is Coming](#). Projects like Food Not Lawns is a great project - Grow food, not lawns. Increasing local food security improves your diet, beautifies your surroundings, builds community, reduces pollution and energy use.

The up and coming Panacea Urban Farming resource will comprise a PDF course and a video production to get any one started with all the possible solutions. **Most will not be aware of how they can utilize a limited space and energy to produce local food co-ops in URBAN settings.**

An overview of some examples include: The square foot gardening system:

Resourceful Square foot gardening

Square foot gardening saves water, nutrients and space. Imagine growing all of these vegetables in one season self contained in a 4 foot by 4 foot area.

16 carrots	9 turnips
4 bunches of leaf lettuce	5 lbs of peas
4 bunches of spinach	1 head of cabbage
16 radishes	4 heads of romaine lettuce
9 beets	1 head of cauliflower
16 scallions	1 head of broccol

An urban street has a greater local food co-op capacity by using this design concept. The second system is designed for apartment dwellers. Window farming is

a hydroponic system; however Panacea will be exploring the capacity to change this system over to Aquaponics, an ORGANIC method that uses fewer resources.

Cheap Hydroponic Window Farm from using recycled materials

There are also patio solutions for apartments and other settings. When a street begins to do this, a phenomenal amount of food production is possible. **The education of community food co-ops is the most important aspect of this concept.**

Photo courtesy of our dearest Linda – Thanks Linda!

The space which one would typically reason to be “concrete” and an impossibility to use for food production is FAR from the case.

Vertical garden - Think of all the unused space in urban settings!

The organic Aquaponic system is one which Panacea will be extensively building and promoting. It is not well known however the Aquaponics method (fish and plants) can make cities self sufficient with organic food and remove the need for using fossil fuels in agriculture and food transport. **This makes Aquaponics the most carbon neutral method for food production in cities.** Aquaponics is the creation of a complete cycle of symbiotic relationships where the fish help plants and the plants help fish. Aquaponics uses no chemicals, requires one tenth of the water needed for field plant production and only a fraction of the water that is used for fish culture.

Aquaponics system- Fish are contained in the bottom tank

Urban hydroponics grow systems can be converted to the Aquaponic method to conserve resources and provide ORGANIC nutrition. This method is not only the fastest way to produce food but also produces the highest yield of produce for the resources needed to create it. The following grow system was donated to Panacea by [DR Grow It All](#) to help us design solutions for the urban farmer and to change over to Aquaponics.

Stack a tubs hydroponic grow system

Panacea wishes to give our special thanks to Dr Grow It All and our respected volunteer "Michael" for this generous support and encouragement to help us find open source solutions for the public. We would like to also thank Dr Grow It All for

giving the farmers suffering from the recent Australian floods a helping hand by donating 125,000 liters of 'Organic Solution Fertilizer' to kick start the recovery of their flood affected land.

Panacea is also grateful for Michael's donation of the [DR Grow It All](#) organic liquid fertilizer for testing. Dr Grow It All organic liquid fertilizer increases crop yields and grows healthier crops more naturally resistant to pest and diseases. This totally organic solution is truly Biogenic due to its self replicating microbial system. It is Ph neutral, unlike other seaweed and manure based products that have high Ph which render nutrients unavailable to plants. Panacea will be investigating its soil repair capacity and will open source our results in our new up and coming Permaculture / Urban Farming courses.

There are many grow systems out there which can benefit from the change over to Aquaponics. This method is the fastest and most resourceful food growing method in the world, and it is ORGANIC.

This Urban farming system can be integrated into the home to recover the energy used in lighting and produce food. Your evening LED lights can be used in your grow system. Light energy is then recovered.

Window farming in Finland using LEDs

Movable grow beds (which are possible) are easily adaptable to harness evening lights for grow systems.

The following compact system is being designed by Panacea. We hope to do research and development to save energy and help educate local food co-ops.

Panacea's Concept

Panacea will also be experimenting with alternative energy systems including the Joule thief to power the LEDS grow systems. The Panacea Urban Farming course will also include Bio dynamic and Permaculture principles. Step by step instructions will show you how to change a typical backyard like this over to the Permaculture and bio dynamic way:

Panacea's Test bed (bottom of photo)

Below is the first stage to transforming your backyard into Permaculture farming. Even weeds are useful and can make fertilizer.

The first stage in the change over process

These systems will be constructed, detailed and filmed by us to help others find solutions to progressively change over to self sufficiency. Our PDF and production is open source and FREE. The Panacea University is the world's only open source curricula, relying on donations to help all.

There are many systems that are needed to be shown to the farmer in order to make them self sufficient from fossil fuel fertilizer and Monsanto's GM round up. Panacea will also be featuring an organic fertilizer and an exciting new ORGANIC ROUNDUP.

Once these urban farming systems are integrated, we then need to build the best nutritional curricula possible. WE need not have the problem of food additives, processed food and no curricula teaching about the medicinal and nutritional benefits of raw whole food nutrition. It gives us great pleasure to present one of our most significant new pages on [ORGANIC raw whole food nutrition](#).

"Conserving," "preserving," and "protecting" define sustainable living. Design systems are the only way to help SAVE the quality of the air we breathe and the water we drink. These design systems are needed to safely treat and dispose of waste, and recycle as much as possible.

"Conserving," "preserving," and "protecting" our bodies' HEALTH through nutrition is part of this process. Organic foods and raw whole food nutrition protects against disease. This is not currently taught in the curricula. However thousands of people throughout the world have maintained successful weight loss and healed themselves of many diseases through ORGANIC raw whole food nutrition.

Further proof of the medicinal capacity of raw foods can be found in [Don Tolman's Farmacist Desk Reference \(FDR\) on wholefoods](#). You do not need big pharma drugs to cure. This system has already prevented and cured diseases such as cancer,

heart disease, and others. Here is a partial list which can be verified through his RAWFOOD whole food system.

Acid reflux, acne, age-related muscular degeneration, ageing, arthritis, atherosclerosis, CANCER, cataracts, high cholesterol, colds, constipation, diabetes, diarrhea, poor digestion, diverticular disease, headaches, heart disease, herpes simplex, hemorrhoids, hypertension, immune deficiency, infection, infertility, insomnia, mental slowness, menopause, motion sickness, obesity, osteoporosis, respiratory ailments, skin disease, stroke, ulcers, varicose veins.

Panacea wishes to again sincerely thank Michael from Dr Grow It All for his unbelievably generous donation of the Vitamix whole food processor to help us open source the whole raw food course.

Vitamix – An industrial grade whole food nutrition blender

This up and coming course cannot be underestimated. Raw whole food nutrition is not mainstream, and this donation will do a world of good and help us show OPEN SOURCE solutions which prove that the majority of the toxic pharmaceutical drugs are not needed. **People must know that they have a cheap and easy way to improve their health, and that pills do not cure but whole food is prevention in the true sense.**

Everything you need to get started to improve your health and PREVENT DISEASE, can be found on our [Organic raw food nutrition page](#). Panacea has begun filming a complete menu resource with many examples to help educate others. **When completed, this will be the largest open source nutrition project to prevent disease that's ever been undertaken. We have been donated one piece of equipment to get started and will work the hardest to complete this with on no budget.**

We have also been very busy helping renewable energy solutions. Panacea is responsible for a unique concept in recovering energy from solar hot water and cooking, using the thermoelectric effect. Panacea inspired one vendor to take the plunge and design this very system to recover energy when ever heat is used in the home to aid solar systems. This system is being tested and will be detailed on the university site this year upon completion.

These solutions are needed now more than ever, the carbon tax is coming, fuel saving modifications and other carbon negative solutions will be needed in future. A Tax is not needed, an incentive that re invests a portion for the user is far more objective, and the majority of people cannot afford to do 2 things. Recently the people of Australia have been "duped" by their government who changed their pre election promise about implementing a carbon tax.

It's time to stand up for truth and common sense

No Carbon-Tax

- \$300 a year more on electricity
- \$6000 more for each new house
- \$How much more for petrol, for gas, and for everything that is moved, packaged, cooled, or warmed?

The Australian parliament promised that there would be no such tax before the election, however like other politicians they didn't lie, they just changed the promise. Honest government seems to be something that remains nonexistent in both the United States and in Australia.

What sustainable design solutions have the most negative carbon foot print and why are we in this mess? Unsustainable development began when the conception of progress was defined as industrial growth and economic expansion. The education system and public relations campaign promoted "consumption". Corporate priorities were allocated to profit through what can only be described as "inappropriate technologies". Through systems, manufacturing and construction that today still causes acid rain, ozone depletion, climate change and leaves a toxic aftermath that PERMANENTLY affects humans and eco immune systems.

These particular externalities have remained intrinsic to a design model of modern "development" and are still currently colonizing the world's cultures and environment. **The present curricula still reflects this choice of industry technology**

despite the renewable alternatives being available. This industry is recognized as reliant on non renewable raw materials and resource capital (forest and fossil fuels for example) other than the renewable alternatives.

This inferior design system continues to create the unnecessary demand of non renewable resources and energy whilst producing excessive waste and pollution downstream. The design, construction and management of the built environment (cities, buildings, landscapes and products) is central to this industrial system because it largely determines the amount of resources, space and energy consumed by this "development". The unnecessary and artificial demand of this industry creates exploitation of the inhabitation of other countries and of their natural resources.

The "west" is exploited under this unsustainable system; however it is at different degrees than cheaper labor in other less developed countries. On Panacea's [new sustainable development page](#) we have outlined the most carbon negative solutions with the educational drive on how to progressively change this system over.

Panacea's ongoing report into Steorn's Orbo Technology

It has been many years since Steorn first announced that they have produced a FREE energy principle that can be developed into a functional device. Steorn issued developer licenses which meant that anyone had access to their intellectual property.

There have been 3 versions released since Steorn originally announced their technology - the PM orbo, the E-orbo and the solid state Orbo. Recently they have come out with a second version of their solid state Orbo intended to be operated as a heater. Steorn now appear to be working with a developer to produce a 15Kw heater. We should have news from Steorn within the next 2 months on this product. It is not clear whether all developers will have access to the heater specifications at this time.

Panacea has been given another year for free to stay on the Steorn developer forum and work with developers to help build a low cost functional device. It has not been easy for any one on the forum to replicate their claims over the years, now it seems we are closer to getting a solid state test being finally completed. This board was designed by developers not Steorn and is based on what information has been provided to us. Panacea is currently testing this board for a heater application.

Panacea's ORT board testing

It has taken a while to get this far, looks like this year will be the final one for Steorn. We will keep our subscribers in touch with the news and continue to work on the developer's board in our possession. Panacea will do everything in our power to be the first to complete a self contained home power application and to get the word out. There are loyal developers there which have come up with their own version of Steorn's solid state board, we are continuing to work with them and exhausting all avenues.

Main page news

New regional currency page coming

The past recessions and current financial crash are enough incentive to start understanding the needed alternatives and solutions. Already we are seeing the first signs of hyper inflation coming.

The [National Inflation Association](#) has issued the 12 warning signs of hyperinflation.

"In our estimation, the most likely time frame for a full-fledged outbreak of hyperinflation is between the years 2013 and 2015," the National Inflation Association warns. "Americans who wait until 2013 to prepare will most likely see the majority of their purchasing power wiped out. It is essential that Americans begin preparing for hyperinflation immediately."

This means the MIDDLE CLASS suffer. We have seen this occur OVER and OVER again since the 1930's. However there seems to be no focus on [what system worked in the great depression](#). Regional currencies are present in many countries but are not being told as a solution to the financial meltdown. The fear is that with hyperinflation, the purchasing power of the dollar will diminish so drastically that the wealth of millions of middle-class will be severely impacted, possibly even wiped out. At the extreme, hyperinflation could be the prelude for the destruction of the dollar.

In the last newsletter, Panacea announced the faculty of economics page to help educate banking reform solutions. This new page had an advantage over other proposed methods to create a stable monetary system. **The Panacea resource allowed the public to enforce the solution through a legal mandate.** This resource presented a proven system to create **interest-free and fee-free loans.**

This is one solution. The other solution is already in effect. We are pleased to announce that we will be creating an open source **regional currency** video and showing how it is the only way to stop the current problems. There are successful regional currency communities which are not suffering the same recession or "credit crunches" as the current system. But who is educating this and policing this?

In the United States, England, Australia, and third world countries, the power to "create credit" or "issue currency" is unnecessarily in private hands. Constitutionally it can be restored into the hands of government for the people and by the people. Only then will money manipulation, usury or the burden of interest and fees on loans will not be necessary. **The current education system is not set up to prove this particular stable pecuniary management of the public's monetary needs.**

Panacea can prove that all that is needed is for the People to know and understand WHY THE ALTERNATIVES HAVE WORKED. Regional currency will be a major educational resource for monetary reform. There are already 12 signs of U.S. hyperinflation and how rampant inflation will destroy the dollar. The best we can opt for is a documentary with the regional currency educational themes. We will do our best on no budget. Here are some links to proven systems involving regional currency:

New Panacea Video productions in the works

The Panacea site is currently being optimized and redone. Additionally, all of the Panacea video productions are being redone with improved content to help address FREE energy suppression, public health and sustainable development.

This includes our Free energy suppression video production with solutions. 3 years ago, Panacea produced a modest FREE energy suppression research production in order to stimulate help and resources towards achieving a goal all in the free energy community are seeking, our own [research center](#).

After 8,384 views of our 10 hour FREE energy production, we have decided to remake this resource with better content and more ideas to help address this problem. The cases continue to rise.

The new productions will be:

Short summary of the Panacea objectives on the website

Greenfest – Re done with more solutions

Alternative cancer cures

Summary of commercial free energy devices

Raw food nutrition

Sustainable farming

Activism

Shorter summary of the fuel saving and pollution reduction technologies

The only activism of its kind is present on the [Panacea Activism page](#)

Panacea's activism work covers a wide range of neglected subject matter. No other organization profiles the same amount of content together. There are many Issues like chemtrails , fluoride, vaccines to the disclosure project (government UFO cover) which need an organization behind ALL of them doing public petitioning and helping with public education.

Being able to consolidate all of these issues and use one petition to address and create public pressure is an objective move created by Panacea. Signatures are rising. However volunteers with experience are required. If you are experienced in class actions, mandates or others please contact us for your ideas we can help take our collected signatures further. In the mean time petition signing on the Panacea site is essential to raise awareness.

Activism is an important life skill, there are many rain forests, to ocean life to even landscape stopped form multinationals due to class actions, mandates and petitions and general activism. Today it is an important life skill and needed.

To effectively deal with hardship and injustice, we are needed to evolve, adapt and learn from history. Today protesting is not what it used to be, you can see that in the recent [In the Wake of the G20: As Canada's Democracy Trembles, a New Global Architecture Emerges](#)

Activism is a big part of justice, no one is going to do it for us we have to accept that and we can make it easy to participate, and this digital resource is needed. In the mean time, important issues like [270,000 farmers in a class action against Monsanto](#) do not enjoy any other support.

There has been effective protest. An important thing to remember about civil disobedience is this: Only non violent protest, or other actions like general strikes, will gain or maintain the greater public's approval. Violent actions make it easy to spin fear generation in the majority who will then side with the government's draconian responses not get angrier from them. Without a wide base of support, any movement is doomed. So there are very practical reasons for non-violent struggle; beyond the moral ones which are pretty compelling too.

Ghandi knew this, and he worked his movement like a military campaign without firing a shot. That campaign was the most successful ever seen; it beat the largest empire ever and there was a great deal of domestic infighting and dissension within their ranks as well including the huge problems between the Islamic and other religions, mainly Hindus but also Jainists, Buddhists, and Sikhs . Sure they still fight there: But allying them against the British even temporarily, who were masters at keeping them all at their own throats, was perhaps the greatest success of all.

The analogy here would be something like uniting all the best approaches and making them work. Panacea will be including these in our Activism video production which is currently under construction. Volunteers are needed as in all our projects, if you have an interest in any of these please contact us.

Attacking the source through public education is what we must do; we have an easy and direct way to do this. We can collect easy digital votes for a corporation charter which can make sure that the renewable energy that's sought after by Obama must include our FREE energy areas of research.

This corporation charter will prevent foreknowledge, conflict of interest, insider trading and judges with financial ties to have the ability to approve permits and police with stricter penalties. **It will also make it mandatory for the renewable FREE energy solution to be used instead of conventional sources.**

One million signatures are possible and can contribute to attacking the source. Please help and pass this link around, it was hard work all of us collecting info – Providing your name, e-mail, and country is easy at the following link – It is all it takes to help the activism that we are involved in.

<http://www.panacea-bocaf.org/forms/evidenceofconcern.php>

Recent Panacea Video productions

Panacea has compiled a fund raising video to help the free energy technology of Philippines inventor Ismael Aviso. Philippines inventor Ismael Aviso is a microwave engineer and industrial automation designer. Ismael has discovered a new highly efficient repelling force principle along with a power system that appears to take energy from the ambient. The ambient energy collector has been developed into a self charging battery application for an electric car.

Ismael Aviso - Extracted from his [TV appearance](#)

The efficiency of Ismael's battery charging system has been validated by the Philippines department of energy. In our video production Panacea included essential background on how free energy devices operate as open systems (ambient energy collectors) and offered our solutions to help train faculties in this unique genre. Ismael is also working on a home power system.

Ismael's "MEG" R & D

Panacea Production [Ismael Aviso repelling Force technology](#)

Panacea has finished compiling an extensive open source educational resource on fuel saving and pollution reduction technologies. In our PDF course and video

production, we have presented our original ideas to help train mechanics and create retrofitting garages. We also detail how to help create government subsidies to help encourage and educate the retrofitting of these technologies.

This move is all about improving public health. The Panacea infrastructure can also help validate and police the fuel savers. On no budget in the mean time, we have validated the following 3 low cost and effective fuel saving and pollution reduction modifications:

Panacea's testing of the Z5 modification

Panacea is the only organization to test 3 particular low cost modifications and present unbiased results. There are 2 particular modifications which are cheaper and easier to install than the typical "hydroxy booster". Both of these low cost modifications are proven to work.

Prolonging Engine Life,
Increasing Fuel Economy,
Reducing Emissions,
Improving Performance.

"Xtreme Fuel Treatment"

Panacea is currently in the middle of testing 2 new hydroxy cells, one is an open source modification. These results will be posted in our new hydroxy video production.

Bill Williams' open source design

Panacea's hydrogen gas splitting test using the HHO-Research cell

Panacea recently emissions tested the "SPAD" unit which is a compact emissions and fuel saver for tractors and diesel agricultural machinery. Dave is a great supporter and volunteer of Panacea; he now is able to spray 4 fields using one tank of diesel as opposed to previously 3 sprays. Probably around a 20-30% saving.

Panacea's "SPAD" Installation - We were able to save up to up to 30% in the diesel consumption of this tractor using this Open source modification.

The results were encouraging even using a brief stationary test under load. Panacea could do more. This is still proof that it reduces the emissions. A longer test would yield more results.

VIEW DATA: All Data		
PXA: HC		94ppm
PXA: CO		0.08%
PXA: CO2		5.9%
PXA: O2		14.0%
PXA: NOx		570ppm
PXA: AFR		25.0
PXA: BATTERY		12.6V

2: Cust 3: Bar 4: Line 5: Olap 7: Frz 9: Font

Emissions test without the SPAD activated

Emissions test with the SPAD activated

Hydrocarbons 94 to 67 which is 29% reduction, CO is .08 down to .07 which is 12.5% and NOx is 570 down to 555 which is 2.63% High fuel prices are upon us again. So please check Panacea's video production which can be found on our [Fuel saving-pollution reduction](#) Page.

Always Refresh the Pages on the BOCAF site

PLEASE ALWAYS REFRESH THE PAGES (by pressing the F5 key) WHEN VISITING THE PANACEA SITE, UNFORTUNATE MISTAKES DUE TO TIME CONSTRAINTS AND BEING UNDERSTAFFED ARE BEING CORRECTED AND NEW CONTENT IS BEING ADDED. Please contact us if you see any mistakes. We appreciate any help and feedback. We are understaffed at this time.

Panacea University News

Update on Panacea's clean no chemical weather engineering technology

Panacea's first competed ground unit

For background on this technology please consult:

www.panacea-bocaf.org/droughtrelief.htm

Our long time supporter's will know that together we have all produced Panacea which now has the world's only clean and non chemical weather engineering technology held in a public trust. There is no cheaper way for the tax payer to:

Dissipate SMOG

Lift FOG

Break DROUGHTS

Fill RESERVOIRS

Calm WINDS

Weaken STORMS

Public demos are needed to police any politicians or conflict of interest from keeping this knowledge suppressed. The task of educating the public is now our purpose. Thanks to the Panacea donors this technology originally donated by [Trevor Constable](#) is ready to be built and tested. Thanks to YOUR donations, we were able to recover our equipment from an unfortunate accident as reported in our last newsletter. Panacea has now started to re build the technology for the first phase of testing.

A ground unit

Thanks to our donors our airborne tube is up and running again.

Airborne tubes

The world has been able to access this technology since the 1950's and save lives. However it remains neglected denied and suppressed. The Job of getting it out there is one that we must do.

Panacea has been collecting records public to show the non compliance by the Australian government to utilize this CLEAN NON CHEMICAL CHEAP weather engineering technology – This technology can save the tax payer more money then what is currently used in its place, it is far cheaper to relieve drought in place of desalination plants and cloud seeding. Panacea continues to collect these records; these records continue to be posted on our [drought relief page](#).

Upon final testing, Panacea intends to demonstrate this technology publicly and take the knowledge to the people; it is only the public who can only police the corruption and politicians. Your nonprofit organization is the only institute which pledges to use donations to educate the world of the altruistic gentleman whom have been performing this drought relief work.

This technology has a CONTINUED line of neglect and suppression; this is the only known process that is able to create atmospheric self regulation and repair drought affected areas. It is essential knowledge to help advance humanity. So far it has not been easy to get it publicly known, however now we finally have a capacity to wake the world up and honor the pioneers who originally set out to educate the world with this process. The late [Wilhelm Reich](#) has been trying to advance education with this method since the 1950's.

We will then help the Australian Murray River drought and gather data to validate the process to help ALL other countries.

We wish to sincerely thank our loyal friends for their consistent donations which got us ALL this far. **WE have the knowledge now and can apply it to work for humanity. We are grateful to all of our supporters for being the only ones to help achieve this so far. WE are in their debt. After all the equipment is completed we will be the first community effort to finally get this technology known and help humanity.** For a brief overview of our NEW records and operation please consult our new video.

[Trevor James Constable Gentlemen Tribute](#)

If you can help speed this along in ANY way and help other communities **please note any needed donations will make THE ONLY difference.** Panacea will be emailing out your hard work AND rewards when the world's first ever independent public demonstration is done.

In the previous newsletter we announced that the Panacea University is expanding to include other categories of open source information for sustainable development. Our intent is to police this particular higher education which would otherwise remain neglected and not accessible due to a conflict of interest. **There are many other areas besides free energy which need protecting and Panacea will be there to support.** All these areas require Panacea's independent, non-aligned and evidence based infrastructure to be truly secure.

We have decided to prioritize the "alternative" cancer cure course. This will also accompany a video production. We will be visiting a recently shut down alternative cancer cure clinic located in Queensland Australia and talking to doctors and film makers who can aid us in showing the alternative cancer cures with the validation we need.

Some of our new categories include "Alternative medicine", Permaculture, Hemp production, RAW food organic nutrition and economics. All of this combined subject matter is required to give you SELF SUFFICIENCY and sustainability. However this education is not policed, secure or even covered in any other faculty. **We are doing this on NO BUDGET. With more donations we can do more.**

We wish to extend our sincere gratitude and thanks to all our new and current subscribers. We are grateful for all of your NEEDED support. You are the only ones who are helping to achieve the objectives we have reported in this newsletter. Panacea's achievements are our own for a simple reason, only at the grass roots level can we achieve what no other organization has done.

These individuals cannot do it alone. Sadly we cannot survive on a shoe string budget. However no matter how small or slight you think your donation is, without it; we won't be able to continue to help. So please consider that the individuals mentioned have done a world of good and that donations WORK. WE are in their debt. We must work together to stop segregation, only collectively we can we reap OUR rewards. Once our educational resources and contributors have peaked, Panacea is then intent exposing them all through our public face. Panacea appeared this year on TV for the second time.

Panacea needs you and donations!

WE cannot survive on a shoe string budget, if you can assist us in any way, shape, or form, [please donate](#).

The proceeds derived from materials offered to the non profit organization are carefully utilized toward various projects to bring about a better future for all. Please help us deliver suppressed and alternative free energy technologies to the public by making a donation.

There are many ways to render assistance towards the reaching of the goals of Panacea-BOCAF. You may, for instance, contribute any ideas or input - let us know of a new website or a replicable project or any such thing. You can also become a volunteer or even offer a donation. For those of you who are not able to use PayPal, it is possible to assist the foundation by mailing any form of assistance to the following address:

Care of Panacea-BOCAF
150 Lytton RD East Brisbane QLD 4169
Australia

www.panacea-bocaf.org/pleasedonate.htm

If you are involved in or can help with any of the subject matter presented on [our projects page](#), please contact us for collaborative work. Only united can we all work effectively to stop subjugation. Also we are helping make real changes by [public activism](#). Please sign our petitions; it's as easy as name email and country.

A reminder for Security

To all our new subscribers- It is Important note that should your news letter not show up and / or the Panacea web site ever be taken down, or anything suspicious like a non response from the nonprofit organization ever occurs - Please email from the link

below (save this link). Along with the following text template provided. [Please email the Panacea web site BEFORE hand to double check.](#)

[Queensland Police headquarters.](#)

Police Headquarters
Queensland Police Service

BRISBANE QLD 4000
Telephone: (07) 3364 6464 (TTY - (07) 3364 4655)
Facsimile: (07) 3236 2359

GPO Box 1440
BRISBANE QLD 4001

Queensland Police Service Internet Web Site - <http://www.police.qld.gov.au>

Hello, I am a news letter subscriber of a nonprofit organization at Panacea-bocaf.org. I am sending this email in order to inform you that the nonprofit organization which is engaged in research and development into alternative and suppressed FREE energy technology may have been targeted and or intimidated. Their news letter has not turned up and or there is no response from their web site. As a news letter subscriber this email has been sent as a precaution, I am acting as a deterrent and as a "watch dog" of their operations. Newsletter subscribers have been informed that the nonprofit organization has visited your police station to go on record detailing that they are perusing this research and further that intimidation or interference may possibly occur. Plus they have reported that previous intimidation has occurred to their registered engineers. Therefore we the news letter subscribers are advised that if anything suspicious arises, for the news letter subscriber to send you this concerned email. Please look into the situation immediately. Regards...

[Send the Email to this link below - Save this link!](#)
<http://www.police.qld.gov.au/Forms/contact.asp>

We are happy to report that no suspicious behavior has happened to your nonprofit organization or to any of our open source engineers despite us being involved in this genre of research that threatens the "status quo". The Panacea's trustees would like to personally congratulate you for playing a continued successful security role with

your news letter subscription. **Thank you for your critically needed support!** – We look forward to reporting to you in the next newsletter **which is due in OCTOBER 2011**.

Please check our [news section](#) on the Panacea-BOCAF site for new video productions coming soon. The nonprofit organization's volunteers are proud to work for the public and look forward to reporting our public service to you soon! **Thank you again for your subscription.**

Sincerely,

The trustee's of Panacea-BOCAF.
