www.panaceauniversity.org

This newsletter is dedicated to Panacea volunteer Peter James for his outstanding accomplishment and public service to humanity.

Panacea-BOCAF is an educational organization which deals in the training, consultation, protection and research into suppressed and alternative FREE energy technology. Panacea also promotes the training and research into sustainable development specifically involving the usage of the available alternatives to the current polluting industrial industries.

Panacea also educates about whole food/organic non toxic nutrition to prevent and treat disease. In addition alternative medicine which like the nutrition research remains suppressed in our education system due to a conflict of interest. Its time to identify why:

Still with no transparency in the money supply, MOST people not realizing that money (DEBT) doesn't buy health or real happiness, criminal corporate agendas occupying war torn countries like [Libya](#), Afghanistan and others, ["governments" complicit in covering up Fukushima radiation](#), [Carbon tax money transfer scams](#), financial meltdowns in Greece, Europe and elsewhere coming, [unfair austerity packages](#), unpredictable weather, Earthquakes, distractions from fake doomsday religious bunker cults, [Terrorism -Deadly Somalia car bombings](#), Big Pharma profits , rising cancer, FREE energy suppression, medical suppression and more, **despite all this** , human needs over corporate greed is steadily becoming more recognized around the globe. People are joining in solidarity to search for the alternatives to the mass injustice by the corporate force of the world.

Regardless of race, creed, gender, religion, sexual orientation, or political affiliation, a global PUBLIC effort is needed to ensure that the human race has a sustainable future. Corporations have no legal charter to limit them gaining the majority of wealth from the people and the Earth. These minorities with economic power have the mental illness to peruse suffering of people and other species plus the death of the Earth. With the political process they are able to determine “democracy” and run governments.

It is not that we don't have [sustainable development for houses](#), plastic, paper, food, clothing and **much more** in [industrial hemp](#); it is not that a [fair and honest banking system](#) isn't possible; it's not that we don't have a [decentralized energy grid capacity](#); it's not that we don't have [raw and organic whole food to prevent disease](#), it is not that we can't make food from biodynamic / permaculture or sustainable farming, it's not that we don't have [alternative medicine](#) and [cancer cures](#).

They have sold our privacy as a commodity. They have used the military and police force to prevent freedom of the press. They have deliberately declined to recall faulty products endangering lives in pursuit of profit.

They determine economic policy, despite the catastrophic failures their policies have produced and continue to produce. They have donated large sums of money to politicians, who are responsible for regulating them. They continue to block alternate forms of energy to keep us dependent on oil.

They continue to block generic forms of medicine that could save people's lives or provide relief in order to protect investments that have already turned a substantial profit. They have purposely covered up oil spills, accidents, faulty bookkeeping, and inactive ingredients in pursuit of profit.

*They purposefully keep people misinformed and fearful through their control of the media. They have accepted private contracts to murder prisoners even when presented with serious doubts about their guilt. They have perpetuated colonialism at home and abroad. They have participated in the torture and murder of innocent civilians overseas. They continue to create weapons of mass destruction in order to receive government contracts. **

In the United States, although it may have taken them a while, people are now ceasing an opportunity, they are finally fed up. The USA started the global occupation protests going on in many countries now. All have growing sentiments towards the death of their unfair system. This is motivated in much the same way it was in Greece and Egypt. The USA “occupy wall Street” ideas and their theme remains the same abroad. **WE MUST UNITE TO POILCE CORRUPTION THROUGH HIGHER EDUCAITON TOWARDS EQUALITY. Panacea is about delivering this higher education and equality. Without donations however, we cannot help wake people up to capacity.**

A scene taken from the first Occupy Wall Street protest

Martin Luther King once said, *"We still have a choice today: nonviolent coexistence, or violent co-annihilation. We must move past indecision to action. If we do not act, we shall surely be dragged down the long, dark, and shameful corridors of time reserved for those who possess power without compassion, might without morality, and strength without sight."*

War is [not] Peace.

Ignorance is [not] Strength.

Freedom is [not] Slavery.

The Occupy Wall Street “statement” is intended for PUBLIC education despite most of consensus reality not realizing due to the lack of mainstream media coverage on this subject. The Panacea statement: **The problem is the corporatocracy, AND LACK OF EDUCATION TO POINT OUT -The serving interest(s) of the corporations and ties [corruption] between government and business, plus the lack of public knowledge on what we can replace this system with. The problem is an educational one. Panacea deals with ALL (not just some) of this education.**

A NON profit organization reaching the masses with the education on ALTERNATIVE SYSTEMS (like banking reform) and these themes means this education lives-Without it so far we have non-policed corporate greed and social inequality –Protestors get maced and clubbed, the truth movement’s capacity is far greater than this, we must work (harder) together to change this.

In 2011 [Police now grab people for no reason](#), this has even been reported on mainstream media, what’s next martial law? The power elite are more organized now. In fact [they can legally bring in troops to “quell the unrest”](#), they even wrote a document about it, they have been planning this for a while.

Known Unknowns: Unconventional "Strategic Shocks" in Defense Strategy Development

Authored by [Mr. Nathan P. Freier](#).

[Anti-war protesters get maced at the National Air & Space Museum](#), the Palestinians are not as lucky to get maced, [Israeli police kicking and punching Palestinian man](#)

A government / business cannot create the most public education; all who are earning money today can contribute to help the truth movements like Panacea and others. They must not think that truth movements can progress without this and help our public education. **You're DONATIONS COUNT, no matter how much they are.**

The link IN THE EDUCATION SYSTEM is not obvious but is: Where corporations, and/or government entities with private components, control the direction and governance of a country, through medical, energy and banking interests, including the carrying out economic planning and infiltration.

In Wall Street this involves government ties, oil companies, multinationals, secret [corporate] societies with EU/NWO union plans and others (baking cartels behind it for more profit from debt), pharmaceutical cartels and banks. This infiltration HAS spread to all countries, Egypt, Greece, Europe, and is not just in Australia (Codex and more coming), USA, and New Zealand etc. Other ["austerity" plans will spread to Euro countries](#) intended to "balance" the unrest. Banks still get richer regardless, we don't. Banks are actually better off since the global recession, it's been happening for years, it's the same system.

We must get out of cyber space

Fifty-one of the world's top 100 economies are not countries but corporations. For example:

Royal Dutch Shell's revenues are greater than Venezuela's Gross National Product

Walmart's revenues are bigger than Indonesia's

General Motors revenues exceed the revenues of Ireland, New Zealand, and Hungary, combined.

These transnational corporations essentially own the world. The world is, in effect, owned by greedy corporations. Corporate globalization is responsible for the economic mess. It cannot get any "fairer". Corporate globalization is also responsible for the environmental mess we find ourselves in today. Corporate globalization has no conscience. The only thing these mammoth corporations recognize is profit. They have no other motive; no other reason to exist. Human values are non-existent in a corporate culture, corporate globalization is EXPANDING not getting smaller.

With the formation of the World Trade Organization in 1995, these large corporate interests wrestled control over patents, tariffs, environmental and food safety laws, labor laws in underdeveloped countries, laws regarding ocean fishing, and many other aspects of the legal processes to safeguard interests around the world.

We need to replace them with an alternative system, you cannot police such mammoth corruption, and their system cannot have equality in it to continue. These alternative systems have been here and working for years.

We must not believe that simply taxing the "rich" and "bringing down Wall Street" are the best answers. Over the past several days, significant demonstrations continue to be held in protest of the corrupt financial system that favors the richest 1% of our nations; while a small percentage of the remaining 99% have to deal with things such as abuse of our civil rights from police, outsourcing of jobs and living off minimum wage whilst petrol prices rise again. [Occupy together](#) is one example of an activism stratagem for this. The minimal corporate owned media attention given to these demonstrations has caused growing concern, with rumors of media blackouts and repealed news coverage becoming increasingly harder to deny.

[In Greece thousands took the streets in general strike](#), fighting the same anti-democratic program of social cuts and banker bailouts that they are fighting on Wall Street. Today, people power shut Greece down. But the banks can start again unless we have banking reform.

The Wall Street partnership with corporations, bankers and governments OF THE WORLD (not just in the USA) has created the environment where policies are created not out of moral obligation for the citizens that it is meant to serve, but for a "profit relationship". Subjugation now includes the police abusing peaceful protestors.

Scene from New Zealand

The "police" are highly organized **against protestors (not crowd control)** today, with new sound gun weapons, fake protestors, roundup techniques and highly aggressive response. We saw this in the G20 summit in Canada. And now we are seeing it in the Brooklyn Bridge and Occupy Wall Street protests. [In New Zealand it is now illegal to hand out leaflets at protests](#)

Only education on the alternative banking systems and OTHERS can prevent the WORLD link between Wall Street and the government. Corrupt banks would then be punished not by the free market; the system would have no more ROLES to create debt. Panacea has education on regional currency and on honest banking systems. There can be no other way to eliminate debt and replace this system. Sadly these protestors are not armed with this needed education, and we intend to help change this with new educational video productions.

A true PIG Officer abusing civil rights at the occupy Wall Street

[Protestors will also get arrested for withdrawing their money from banks.](#) In the above picture we can look at the first amendment of the United States in action today, human rights abuse continue and not just in the united States, they forget that their own forefathers warned against this in the 1700's. **Forgetting to have a plan ABOUT THIS TODAY also means that the rest of the world has the same problem. Yes we all live in America too.**

We have a picture of : "A white-shirt, now known to be [NYPD Lieutenant Anthony Bologna](#), comes from the left, walks straight up to the three young girls at the front of the crowd, and pepper-sprays them in the face for a few seconds, continuing as they scream 'No! Why are you doing that?!'.

Corporate capitalism

We could go on and on about this issue. The GLOBAL Wall Street infiltrated government FRAUDS who crashed the world economy, in 2008, (USA, Europe, Ireland Greece and many more on the way to a PERMANENT debt crisis) are alive and well today. **Not one of the Wall Street/government CRIMINALS have been charged or arrested, but instead; they have been bailed out by government**

(more corruption detailed below) ; THEY ARE FINE, HOWEVER NON VIOLENT Protestors AND THEIR CIVIL RIGHTS GET ABUSED BY PROTESTING THIS FACT. A DUMBED DOWN HYPOCRASY REMAINS, for most of the population, football, GMO foods, entertainment and dead end jobs keeps them “happy” mean time.

[Wall Street mocking toast](#) to the protestors, the alcohol is on us, we are paying for it through never ending DEBT

It's a different story in Greece; there can be no doubt that Greece is going to get uglier. Greece does not have the banking reform education to free them from debt; **Panacea provides this banking reform information**. There is no other way to cure DEBT. It cannot be cured by salary or money cuts, only by replacing the system with an honest banking system can we make history and reform your DEBT future.

A Scene from Greece, more unrest is to follow from their “austerity packages”

Libya will soon be “liberated” by the banking “debt infiltrated system “thanks to “NATO” and we will ALL, yes ALL, continue to operate as debt slaves if we do not help each other to present higher education ON THE ALTERNATIVE BANKING SYSTEM, SELF SUFFICIENT COMMUNITIES AND OTHER EDUCATION PANACEA DEALS WITH....and make sure we reach/educate the public.

Scene from Libya — Get ready for a NWO banking system to subjugate Libya

This is the reasoning for Panacea appearing on mainstream TV, we are a Trojan horse, we have to start somewhere, when we do this; people visit YOUR Panacea site and will certainly get more of an education than they “expect.” **That is the name of the game, waking people up.**

Our site boast the most educational reform subject matter in one place, and is slowly growing and getting better. Panacea is unlike David Icke who will charge hundreds of dollars to talk for 8 hours and have no open source information, Panacea unlike the rest offers sustainable development and activism, we have an open source online university, we act out community donation work and intend to create health and self sufficient information to “get off the grid”. A self sufficiency course is coming to our OPEN SOURCE University. Our R & D won’t stop until this is done. What else have we got to hope for, banks getting us out of debt?

Panacea’s SECOND TV appearance featuring the Panacea University in 2011

More TV is planned for Panacea next year regarding “alternative” cancer cures to help this effort. We digress: In the west and in other countries, “Traditional non-violent protest” have become a “magnet” for riot police to exercise new FACIST “crowd control” technology and abuse civil rights. They are attempting to erode the will of the people event after event. It’s not enough that their message will never be heard IN THE MAINSTRAM due to the mainstream news not covering WHY they are there AND THE NEEDED ALTERNATIVES.

Panacea University in 2011 on TV

Now the “crowd control police” will use physical force to “remove you”. AGAIN you can ask the [Canadian G-20 summit](#) protestors about this. The Occupy Wall Street abuse is to be expected but why are protestors not prepared to learn from history and prepare for this?

Whilst protestors gather, they must arm themselves with the alternative EDUCATION to replace the system, and gather momentum this way, not hope that the media will report the REAL “protest” statement, they never will. “Goon” will come in and there will be a media blackout, the truth movements will report to themselves! Sadly as we have seen over the years, disrupting only carries a one dimensional message to the mainstream which is “we are not happy with this”. **What about the WHY WITH WHAT is better?**

For America they need to protest WITH this info [Ron Paul: the Fed Has Failed](#) . Only continuing to protest without EDUCATION for reversing the current organizational behavior will mean the demands will be easily be ignored/overlooked in a media saturated environment. The methods of controlling and marginalizing it have become widely practiced/tolerated (from “free speech zones” to non-lethal weapons to crowd sourced identification of protesters). **YOUR donations to Panacea thus have a purpose to help what education needs support and how to what to replace the system with.**

Further, shame doesn't work anymore as a means of dissuasion. Given these impediments, the revival of protest means rethinking how it is used as a coercive tool. It means going beyond attrition (boycotts, physical damage, etc.) and moral suasion (signage, marches, etc.) and not into the realm of systemic disruption, but towards the way to **replace the system through education -WAKING PEOPLE UP TO THE ALTERNATIVE SYSTEM.** Yes, waking people up to the alternatives. If not, would you be surprised that we **ONLY** repeat history? That's all we have done.

WHY IS IT THAT,

Police & Military power seems to be used against the people of the world more often than corrupted officials. and wealthy financial insitutions? Whether it be the continous police assault on rights and well-being of the occupy wall street movement in NYC. police attacks on rebels in Egypt. or in history. the brutal attacks on civil rights movements.

we see a consistant pattern. This tells us that these happenings are not likely to be due to police acting on an individual basis. What this does tell us is, their role in relation to the greater global power structure; Which is to protect & serve the 1% of the population. More or less, state power acts as the barrier between the people's 'pitchforks' & the banks. Obama even pretty much said it in a private meeting with bank executives, as he exclaimed to them, "My administration is the only thing between you and the pitchforks."

WHAT DOES THIS MEAN FOR US?

It means we continue to occupy spaces, we continue to self-organize, continue to strike, we continue to resist the attacks on the people.

But don't be fooled. Know the insistutions that will attack the people when they stand up, and be expected to have to **DEFEND THE MOVEMENT!**

The government is infiltrated by large organizations, MORE SO NOW THAN ANY OTHER TIME IN HUMAN HISTROY, the public have subjugation, whether they be corporations or bureaucracies,

decision making is dominated by a small number of very manipulative, wealthy, powerful people protected by a phalanx of senior specialists. **They are not for democracies, which is why you have inequality in the financial system and in corporate practices.** Yet, in modern western societies, this elite group and their specialists are able to dissociate themselves from jobs when it comes to their private lives. They live unencumbered within our impersonal society. WHY? We don't seem to visualize this element as being significant.

'RAT RACE'

Why choose your life for them?

So far without giving the most attention to the education Panacea references to replace the corrupt system, the only "defense or affirmative action" by groups like [Anonymous, Occupy Wall Street, Call to Action](#) is to cease an opportunity for **disruptive** non-violent protest. Identify the perpetrators, in the hope that they will become vulnerable nodes within the targeted organization's network that would cause the most damage if disrupted. 1% of the population can still protect 1% who controls the world's authorities. The Rich don't care if police abuse your civil rights on the street and we identify them. Where else can it go? Occupation there is still needed but we must work for solutions.

[Fox news being shunned](#)

Essentially, the reaction or protest plan is to successfully deter/coerce individual decision makers in this decision making RICH group to win. And what do they win exactly? We can see this type of protest working in a limited fashion in the work of 4Chan's Anonymous and China's human flesh search engine. Both of these open source movements have shown to be surprisingly powerful at targeting single individuals (although resulted in only temporary disrupting organizations). By using thousands of contributors, they are able to gather intelligence information on an individual (and their family). In short, learn everything about the target down to bank account numbers. This then enables the movement to target the individual and their family with:

Stalking and harassment. In the street, at a restaurant, or at school.

Identity theft. From financial to professional. Publication of private information.

Denial of communication. Flood phones, e-mail accounts, voice-mail, etc.

So the individual goes, but the corrupt system remains. These are PART of the tools to DISRUPT but not the means to change the system. As long as we are brainstorming for this, than we will get somewhere.

This is why Panacea is involved in OPEN SOURCE self sufficiency education and only asks for donations to help the EDUCATION of these alternatives. Without this targeted area. The more you focus on a single person or system failing in the senior decision making group, or the publicity of the group, the more effective the coercion is FOR THAT INDIVIDUAL ONLY AND NOT AGAINST THE SYSTEM. He/she WILL be replaced.

Protesting in order for blanket coercion of individuals in companies or Wall Street appears to be weaker since it allows the consequences to be shared by a group. However to think that this aggressive, amorphous mass vs. single individual can connect decision making within corporate hierarchies with personal consequence of that individual has never meant long term results. Shame (public pressure) and guilt (traditional morality) are limiting tools for regulating behavior within the VAST NUMBERS OF THIS CORRUPT MODERN CONTEXT (too many of them now and too connected). Don't get us wrong, **support Occupy Wall Street but we must have EDUCATION PLANS ALONG WITH IT.**

Panacea is now editing a banking reform video production which will include all the stable banking alternatives and options like removing money to credit unions and HOW TO GET A FEE FREE, INTERST FREE LOAN as detailed in the Panacea faculty of economics page.

Panacea faculty of economics educational vehicle

A reminder of something that does not appear to be known in the average house hold:

(President) Lincoln opposed the banking cartel - Assassinated

(President) Taylor opposed the banking cartel - Assassinated

(President) Garfield opposed the banking cartel - Assassinated

(President) Kennedy opposed the banking cartel - Assassinated

(President) Jackson opposed the banking cartel – Assassination Attempt (survived)

(President) Buchanan opposed the banking cartel - Poisoned

(President) Ford opposed the banking cartel - 2 Assassination Attempts

(President) Reagan opposed the banking cartel - 1 Assassination Attempt

Panacea intends to produce new video productions to present these activist elements & how to use protest as the theme to spread the education of the alternatives. There are growing cases to show that even where honest government gets in, this cannot last; the system needs more reform, you can ask the Bolivians today.

Bolivia Multinational protest

In Panacea's last newsletter, we mentioned that our self sufficient course will entail community based banking, local food co-ops, urban farming, medical /raw organic whole food medicine, all these are workable solutions to our problems, and we seem to be the only organization packaging them ALL in one place.

To do this we need to work together and must thank you for your support and donations over the years, we are growing. We think Panacea has made enough of a point for now for the truth movements - and to what sets Panacea's goals apart from others. We all will need to contribute in ANY way to help educate the alternatives to truly reform the system, energy and time must be spent on collective self sufficient systems that can SHOW THE WORLD these **alternatives**. These are only being neglected because people do not know about them. So let's update our role in getting this info out there.

On that note -Welcome to your nonprofit organizations newsletter in mid October 2011, **we have been very busy (surprise!)**, in this report: Alternative cancer Cures /alternative medicine, Hidro free energy fund raiser, organic raw/whole food, clean non chemical weather engineering updates, fuel saving updates, plus open source Free energy R & D updates.

The Panacea directors, volunteers and trustee's would like to sincerely thank all our special friends and donators out there for your interests and kind words. Panacea is struggling, but you keep us alive with your help, all your well wishing, and when you can, your donations. We hope to have a new newsletter report with new achievements for you in the New Year (March 2012). Times are tough for us now my friends, but we have to continue work - if not us, than who? If not now, then when? Donations help us survive, no matter how small; we wish to thank all your sincere efforts and our dear friends for your support.

The Trustee's of Panacea-BOCAF

Main page news

[Panacea's sustainable development Hemp pages](#) will soon get their own video production educating how there can be no sustainable future for industry without this plant. As soon as our funds are raised we will have the only industrial HEMP training and demonstration program of its type to educate the public. Panacea has a farm donated to us for this purpose. However licensing and other fees are stopping us but hopefully not for much longer. WWOOFers (free workers on organic farms) can maintain this resource, and make life easy for farmers. With undeniable ideas and examples like how major newspapers can use our industrial hemp to make sustainable newspaper, celebrities will be contacted after our FREE giveaway program is in effect to help promote sustainable industry with hemp.

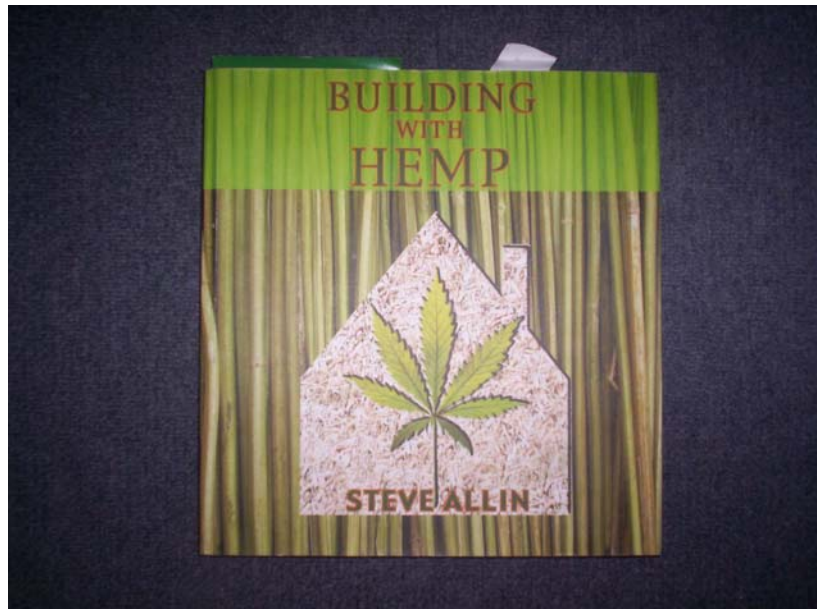

Farmers can grow this for all newspaper industries and be carbon negative (not taxed). **They can also supply hempcrete for the building industry, the most carbon negative solution for this resource in the world.** You cannot make plastic any more renewably than hemp, yet no university teaches this process at this time. Did you know that hemp is the most renewable resource in the world for newspaper? There is no government program to help endorse this. The following HEMP shoes, bag, shirt and shorts, shows that we can change the tide, Panacea's future TV appearances will be show casing industrial hemp for renewable work and foot wear.

ALL MADE FROM HEMP THERE- Panacea Volunteer and Trustee with Hemp wear for sustainable industry education

We saw in the 2010 documentary tapped how plastic in bottled water creates death, yes death. The Panacea hemp program is important as we can show how hemp plastic is a safer non toxic and

renewable alternative. We have much planned with our give away and hemp program, and hope to gather enough donations to erect it and begin a NEEDED training course in sustainable development with hemp. Hemp must be extended to the mainstream paper industry and in building; Panacea will soon be providing courses in Hemp building for eco housing and to help get this into the building code.

Panacea Hemp building Research book

Nature has provided us with all the knowledge we could ever need to live a sustainable and near self sufficient quality of life. The Earth provides us with an abundance of the right materials to create efficient and renewable Eco housing design systems. Adopting them is both simple and cost effective.

Eco-housing is in essence an imitation of what works the best in nature. Take an ecosystem which is a community of living and nonliving things that support and depend on one another. For instance, in a forest ecosystem, some animals eat plants. They digest the plants and make dung, or waste. This waste eventually breaks down. It adds nutrients to the soil. Nutrients in the soil help plants grow. Animals eat the plants, and the cycle continues.

Panacea Hemp building Research book

People who use ECO construction intend to imitate the sustainable natural world. In these designs they have created housing and other buildings that work in harmony with the surrounding ecosystem. The term Eco-housing refers to this kind of design protocol and evolving construction.

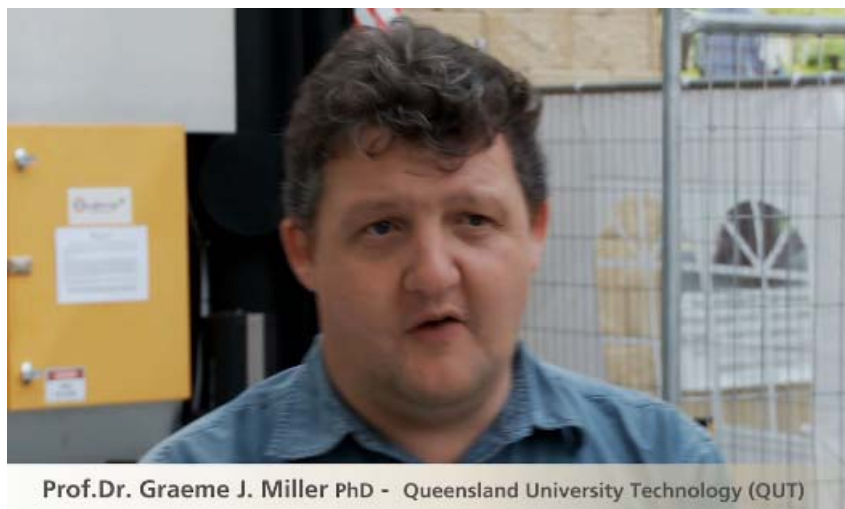

Panacea has authored a new page on eco housing and offers unique training and consultation in this area www.panacea-bocaf.org/ecohousing.htm

Please refresh the page – it is updated periodically.

Hidro is a proven FREE energy device and MUST stop Gas fracking

Panacea has completed a new fundraiser video production to help to finance a publicly displayed working free energy device featured on our [Summary of commercial free energy devices](#) web page. This page presents the needed solutions to help protect free new energy devices, build consumer awareness and demand and help them with real time progress.

Hidro works but don't take our word for it, this scene is taken from one of Hidro's up and coming video "power to the people".

Prof. Dr. Graeme J. Miller PhD - Queensland University Technology (QUT)

To deal with dangerous coal seam gas (hydraulic gas fracking) Panacea has produced [Panacea Sustainable Technologies \(fundraiser\)](#) . If Panacea can raise the needed 200K for the Sustainable Technologies fundraiser, we will be able to operate the world's first publicly displayed free energy device.

The 20 kW Hidro system evaluated by Queensland University and Panacea

Please visit [our Hidro page](#) for more details (Refresh page). Your help is needed to spread this through your social networks like Facebook etc. Only together can we prove there are neglected solutions to cheaper electricity and renewable energy.

Donations count as deploying sustainable technologies like Hidro means CHEAPER electricity. This technology has been designed to co-exist with the current energy infrastructure to avoid transmission losses, add capacity to the energy grid and to achieve carbon neutral generation. They can be constructed anywhere in the world, ideally in 1 Mega-Watt modules. These modules can provide continuous electricity for 1300 homes adjoining existing substations capable of saving up to 47% of retail electricity bills and in non-grid regions as a Distributed Power System. Hidro generators are not affected by fluctuations in the weather and each 1 Mega-watt plant will reduce CO2 emissions equivalent to taking 7,968 cars off the road per year (versus current power infrastructure).

Note: Hidro+ does not partake in the process of fund raising and its proceeds and/or allocations. Panacea is an independent, evidence-based and non-aligned, non-profit institute. Panacea is not affiliated or connected with Hidro in any way. The purchase of the Hidro system by Panacea would not be for a one-time demo, but for an on-going educational campaign. During the campaign, the benefits of such environmentally friendly energy sources would be exclaimed, while individuals and communities would reap benefits from the power it produces.

Panacea-BOCAF's campaign to get started and financed is minimal. Billions of dollars are spent each year giving subsidies to gas fracking research, so called "clean coal" and other

environmentally unfriendly technologies. A tiny, miniscule fraction of that could finance this drive many times over. The money is out there. Do you know someone who can make a donation towards this effort? Are you considering making a donation? Please feel free to [contact](#) Panacea - BOCAF.

You can still help to raise funds by spreading the word to see if anyone can help and sponsor the Panacea sustainable technologies educational program. Please don't underestimate this valuable aid. It even helps to check out what the adds on the Panacea website have to offer. When Panacea acquires Hidro and displays publicly the device in a factory which has already been offered to us, there will be many avenues where Panacea can promote higher education from reforming banks, Pharma, and more.

Hidro could be used objectively by many groups. One artist who deserves Hidro to power his work is one of our most prized contributors- [Artist ESA from Lack luster](#), has done many a service to Panacea and the free energy community over the years, his service is second to none, like our trustee Rolf, who just inspires the hell out of so many of us that much we don't even think about failure any more.

Friend of the Earth - ESA and lackluster of cause

This artist is unique as he is the only one with subject matter that is pertinent to our research. It is important to note that contributors like ESA help fix and improve the content on the Panacea website, we are slowly getting there. The Panacea website is currently undergoing a COMPLETE rewrite and presentation, please bear with us. In the mean time, the priority is to get the open source education out there which we are committed to.

New Alternative cancer treatment page- Panacea has completed a new alternative cancer treatment page, **this page details the most detail of open source cancer prevention and treatment diets ever collected**, its part of our new expanding alternative medicinal section, which will soon include new video productions on alternative cancer treatments and on alternative medicine.

Why alternative cancer treatments? Statistically speaking, conventional cancer treatments like surgery, chemotherapy, and radiation, are ineffective and dangerous "treatments". However your

oncologist won't tell you this directly. They are not trained in nutrition either. [Read - How toxic chemotherapy kills both cancer cells and cancer patients](#)

Dr. Moss' work documents the ineffectiveness of chemotherapy on most forms of cancer. However, he is fair in pointing out that there are the following exceptions: Acute lymphocytic leukemia, Hodgkin's disease, and nonseminomatous testicular cancer. Also, a few very rare forms of cancer, including choriocarcinoma, Wilm's tumor, and retinoblastoma.

But all of these account for only 2% to 4% of all cancers occurring in the United States. This leaves some 96% to 98% of other cancers, in which chemotherapy doesn't eliminate the disease. The vast majority of cancers, such as breast, colon, and lung cancer are barely touched by chemotherapy. However, there is another category where chemotherapy has a relatively minor effect -- The most "successful" of these is in Stage 3 ovarian cancer, where chemotherapy appears to extend life by perhaps eighteen months, and small-cell lung cancer in which chemotherapy might offer six more months. -[Dr Mercola](#)

Thanks to our volunteers, we have new proof of alternative cancer cures and plan to exposé this to mainstream media next year. The following is a preview of Panacea's up and coming alternative cancer treatments course:

Warning graphic photos follow

Panacea's records, experience, and research with black salve prove that where the correct formula of black salve has been applied, it is safe and successful in treating BCC, SCC skin cancer, breast cancer and even Ewing sarcoma (so called "incurable cancer"). Our first volunteer to reinforce this is Peter James. Peter is an alternative energy researcher who presently works with hydrogen on demand technology.

Panacea's hard worker – Peter James

Peter was diagnosed with a generic SCC skin cancer. Here are the photo records of Peter's SCC condition. Note that the name "Peter James" is written on the top of this form. Panacea can provide the original to any parties needing further confirmation.

CLINICAL NOTES

Biopsy of unknown healing ulcer on left foot. Tests show normal circulation.

MACROSCOPIC EXAMINATION

"L inner foot". Specimen consists of a punch biopsy of skin 3mm in diameter to a depth of 3mm 1p 1b sae (vg/cw).

MICROSCOPIC EXAMINATION

The sections showed the presence of an ulcerated infiltrating squamous cell carcinoma, extending to the lateral margins and to a depth of 0.7mm deep.

SUMMARY

LEFT FOOT : SQUAMOUS CELL CARCINOMA. < SCC - CONFIRMED

18/7/2011/LL
 Reported by Dr Graham Windrum - (02) 9005 7774
 Verified by Dr Graham Windrum

Requested Tests : HIS

Peter James SCC cancer Confirmed

Peter was advised to have a biopsy - This gave Peter a MRSA (Methicillin Resistant Staphylococcus Aureus) and cellulitis infections which he cured using aloe vera and colloidal silver. After Panacea advised Peter to use black salve to rid himself of this cancer and avoid surgery, he achieved the following results. These records and pictures speak for themselves.

Panacea Volunteer Peter James - Black salve result

Above is a dated photo chronology of Peter's black salve application, the salve stimulated the immune system to push the SCC cancer tumor out. Peter then sent the resulting tumor to pathology which then confirmed Peter was cancer free. As a result, they cancelled their revenue making surgery.

HISTOPATHOLOGY REPORT : 8430-11G5

CLINICAL NOTES:
Chronic ulcer left foot ? SCC change

MACROSCOPIC:
'Biopsy left foot ulcer'. An ellipse of incisional biopsy measuring 8x4mm excised to a depth of up to 4mm. Embedded whole. 1/11/11. FH.

MICROSCOPIC:
Sections show a fragment of solar damaged skin extending to include deep reticular dermis. Towards the edge there is an irregular defect, and the dermis within this area contains organising granulation tissue, extravasated red blood cells and a mild chronic inflammatory infiltrate in keeping with either a prior excision or repeated trauma. The epidermis at this edge contains two pseudo vesicles containing neutrophilic debris and red blood cells. PAS stain for fungal elements is negative. The remaining epidermis shows no significant abnormality with the exception of compact hyperkeratosis. There is no evidence of dysplasia or malignancy in the multiple levels examined.

DIAGNOSIS: **No Evidence of Fungal or SSC**

SKIN LEFT FOOT - ORGANISING GRANULATION TISSUE

Reported by Dr Jessamine Reddy (0298556411)

Surgey CANCELLED by Dr Harris (General Surgeon)

Peter James Pathology report - SCC cancer removed by black salve, no surgery necessary. Surgery cancelled by the general surgeon

Here is an update: almost healed completely:

Panacea can provide the original to any parties needing further confirmation. Peter is one of the lucky ones; most undergo the knife with no informed consent from allopathic medicine about this CHEAP proven and non toxic natural treatment. Breast cancer patients lose their breast, even worse ewing sarcoma patients go on to think they need to die.

This continues because there is no one policing the cancer industry from giving cancer patients an informed consent about black salve. We can prevent this by working together. We have another volunteer Marty who is featured in Panacea's black salve document. Marty also cured himself of a generic skin cancer using the low cost no surgical ointment.

Marty's result - no charge on Medicare, yet cheap results.

As we were authoring this newsletter, Panacea helped another volunteer and will have more medical proof of this; we intend to disclose how to record this with allopathic records to help prove that the cancer industry is redundant with these cancer conditions and only continues because of an educational crisis.

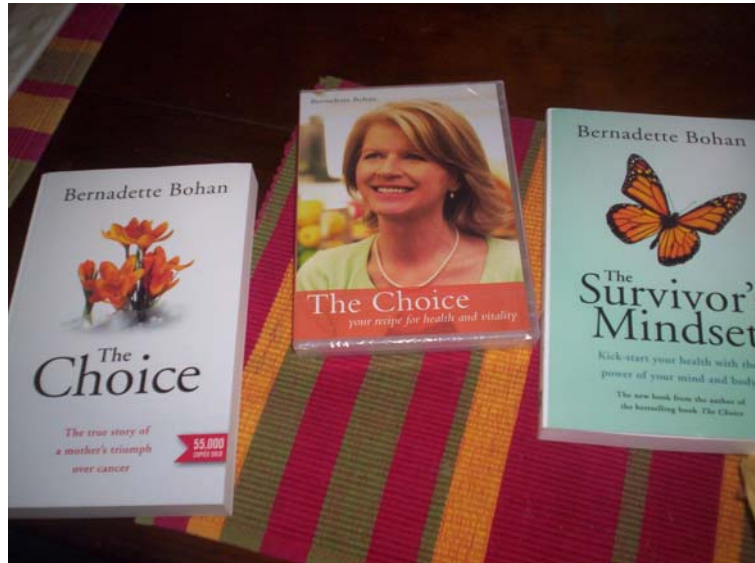

Panaceas volunteer Bruce undergoing the Black salve healing process

There are thousands more who can testify to the effectiveness of this safe, non toxic, cheap herbal CURE over surgery. There is a long history of its use. Websites like Quackwatch are basically reporting a tale of from an incorrect formula; therefore you must always acquire black salve from trusted sources. Contact us or try [Centreforce](#), [Bevan Potter](#) . [Alpha Omega Labs](#)

Panacea understands that cancer prevention is the only real treatment or true cure. Nearly ALL alternative cancer treatments focus on strengthening the immune system to eliminate the cancer. It is for this reason that Panacea has authored an [extensive organic raw food nutrition page](#) to educate how to PREVENT CANCER and protect the immune system. **Please look at this diet as it will save lives.**

Panacea has begun filming the world's biggest organic /whole food nutrition video production (donations help) to educate the public in cancer PREVENTION and healthy living. This will also be aimed at to preventing Big Pharma from replacing nature's education.

Recent Cancer diet research books purchased by Panacea

This is needed, the system will never change, you can read [He Who Pays the Piper - Creation of the Modern Medical \(Drug\) Establishment by G. Edward Griffin](#)

The industry started in 1910 with the Flexnor report (Rockefeller funded), there use to be all sorts of doctors (homeopaths, herbalists, osteopaths and biomedicine (allopathy), the flexnor report eliminated all but allopaths for being qualified as MDs.

Since then, doctors are taken at a young age from graduation from college with little experience in the world beyond frat parties and programmed learning into a world of drugs controlled by the pharmaceutical companies. They are fully brainwashed, never allowed to read or consider an opposing opinion, (if they want to get high grades) put under immense stress learning absolute propaganda, forced to work ridiculous hours in residency, subjected repeatedly to pharmaceutical propaganda, FDA (same in all countries) controlled medicines and devices that do not cure.

The Fraud of oncology, an educational crisis we intend to fix

They don't stand a chance of saving themselves, miraculously a few do, who have bucked the system and found their pathway to true healing. They are a cut above much of humanity for what they have been through.

Panacea have been doing over 9 months of research into nutrition and will make the statement that we have found the best balance of whole foods, raw food, vegan, vegetarian and even 10% meat dishes. The best juicing and whole food medicines and have produced our own dishes for cancer suffers and for cancer prevention. There are a number of dishes which significantly pack a punch for cancer treatment and prevention diets. You must avoid cancer causing foods whilst doing all this.

Do all of this after a:

- 1) Colon cleanse
- 2) Parasite Cleanse
- 3) Kidney Cleanse
- 4) Liver/Gall Bladder Cleanse
- 5) Blood Cleanse

Panacea created dish for cancer prevention and treatment

Cancer patients can get the most dietary benefits from ORGANIC cruciferous vegetables which have known cancer fighting properties that are even acknowledged by the mainstream. These include broccoli, cauliflower, brussel sprouts, kale, cabbage, and bok choy. With carrots, beetroot and tomato, you will have additional cancer fighting properties. To make this salad complete, add buckwheat or other **sprouts** with a simple dressing like:

- 1/2 cup apple cider vinegar
- 1/2 lemon juiced
- 1/4 cup olive oil
- 1 tea spoon of raw organic honey
- 1 tea spoon of Himalayan Salt

Juicing wheatgrass or barley grass once per day (powder form can suffice if you can't get live foods) with the juice of the following veggies in a cold press juicer gives more prevention and treatment.

Juice:
Carrots
Broccoli
Cauliflower
Cabbage
Brussels sprouts
Bok Choy
tomato
Beetroot
Asparagus
Kale

Add in an apple to sweeten the taste. You can blend in the apple seed; it has beneficial vitamin B17 inside the apple seed. You can even use the needed left over fiber from juicing and sprinkle it over salads.

All the anti oxidant colors of the rainbow

This will make a good lunch and dinner with cooked whole grains such as quinoa, millet or buckwheat. Only 10% to NO meat is advised. If you are to eat 10% meat, it has to be organic.

For breakfast and morning tea, anyone with cancer or another health problem, it's important to consume the following Budwig recipe **twice a day**.

Dr. Johanna Budwig, a German biochemist and expert on fats and oils, holds a Ph.D. in Natural Science, has undergone medical training, and was schooled in pharmaceutical science, physics, botany and biology. She is best known for her extensive research on the properties and benefits of flaxseed oil combined with sulphurated proteins in the diet, and over the years has published a number of books on the subject, including: "Cancer--A Fat Problem", "The Death of the Tumor," and "True Health Against Arteriosclerosis, Heart Infarction & Cancer".

Johan Budwig

"Dr. Budwig found that the blood of seriously ill cancer patients was deficient in certain important essential ingredients which included substances called phosphatides and lipoproteins, while the blood of a healthy person always contains sufficient quantities of these essential ingredients. She found that when these natural ingredients were replaced over approximately a three month period, tumors gradually receded, weakness and anemia disappeared and life energy was restored. Symptoms of cancer, liver dysfunction and diabetes were alleviated.

The taste & texture can be varied by adding different fruits or even savory foods such as garlic & onions. If you don't have cancer or another condition, but want to use these recipes to help prevent disease, eat these salads, Budwig diet, mixtures and juice once a day & avoid unhealthy foods & practices.

Breakfast and Morning tea –Budwig protocol

Ratios of 2 tablespoons of organic cottage cheese, quark or kefir to 1 table spoon of ORGANIC cold pressed flax oil. Example to use: 3 table spoons of organic flax oil - 6 table spoons of organic cottage cheese, quark or kefir. Mix together with a hand blender until it looks like there is no oil separated from the cheese. Ground 2 table tablespoons of whole brown flaxseeds in a coffee grinder (just don't use a high speed blender like the Vitamix) and add them into the blended cottage cheese, quark or kefir / flax oil mix.

Add cancer fighting fruits like Strawberries and blueberries, at least one raw Brazil nut (contains cancer fighting selenium). [Here is a good video to demonstrate the process.](#) **You must consume the Budwig mixture within 20 minutes of making it. Do NOT make more than you need or refrigerate leftovers**

Panacea Turmeric Dip

This dish is invented by us and has turmeric (highest known cancer fighting substance) ginger (cancer fighting), garlic (cancer fighting), paprika (second highest known cancer fighting substance (aside from Turmeric))

1 Cup Soaked Almonds (over night to remove their enzymes)

1 Cup Young Coconut Flesh (1 – 2 young coconuts)

1/4 Coconut Water (from young coconut)

2 Tablespoons organic cold pressed Olive Oil

1 Clove Garlic

2 teaspoons Turmeric

1 teaspoon Ginger

1 Sliced Cucumber

Sprinkle of Paprika

Optional: other dipping veggies (celery, carrots, etc)

Mix all in low speed blender and serve of sliced cucumber (alkaline food). Add pinches of Paprika for need cancer fighting.

Panacea created dish for cancer prevention and treatment

Examples of cancer cell killing nutrients (direct or indirect) in ORGANIC raw vegetables, fruits and raw food juices:

Raw Carrots (alpha carotene, beta carotene, Vitamin E),

Raw Broccoli (sulforaphanes/isothiocyanates),

Raw red or green cabbage (isothiocyanates),

Green Asparagus (saponins),
Beetroot/red beets (proanthocyanidins (PAC's or OPC's)),
Turmeric (a spice) (curcumin), or an example of the known cancer-killing nutrients in fruits:
Raw pineapple (bromelain and pexoxidase),
Whole purple grapes with seeds and skins(Resveratrol),
Apricot seeds (B17,laetrile),
Strawberries, red raspberries, black raspberries (laetrile and ellagic acid),
Blueberries (ellagic acid, anthrocyanins, OPC or proanthocyanidins (OPC's), resveratrol, flavonols,
and tannins),

ALL these foods have **proven** chemo preventative properties, this dietary selection with stress reduction (yoga, qi gong), pure spring water or ionized alkaline water and exercise (walking), only work only if you avoid the following foods.

Absolutely none (if you want to survive).

Food that feed and strengthen the cancer cells or the microbes in the cancer cells and body:
Eliminate processed foods, GMO foods, MSG, aspartame, high fructose corn syrup, bleached flour products, and processed table sugar. Refined sugar, refined flour, soft drinks, specific dairy products

Any amounts of high fructose corn syrup, a mix of fructose and glucose that is used in soft drinks, bread and a range of other foods. Refined salt. **Pasteurized** dairy (milk ,ice cream, cheese). Only Raw cream, raw milk, or cottage cheese or skim milk as dairy alternatives, and Himalayan rock salt or sea salt instead of refined salt, when used in the Budwig Diet.

Foods that directly interfere with alternative treatments for cancer include chlorine, fluoride, alcohol, coffee, tobacco, drugs of any kind. Foods that cause cancer (e.g. trans fatty acids [margarine, French fries and virtually every other processed food you buy], additives like aspartame [Diet Coke, NutraSweet, Equal, etc.], MSG, polyunsaturated oils [e.g. corn oil], etc.)

Processed foods rob the body of digestive enzymes and drains the body's ability to have metabolic enzymes that support the immune system and ultimately defeat the cancer. We will be eating raw organic food only.

Foods that occupy and distract the immunity system from focusing on killing the cancer cells include beef, turkey, cooked vegetables is to be down to nearly zero. The cooking destroys the enzymes in the vegetables and makes them far less digestible and far less effective in treating cancer. Pasteurizing any food or drink also does this.

Any vegetables that are not organic. Do not microwave any foods during a cancer diet. Avoid all chlorine in your diet - this includes avoiding foods made with tap water. Chlorine destroys many phytonutrients and other nutrients, thus the damage done to the food during processing, if chlorine is used, the damage is permanent and cannot be reversed. This means, for example, not drinking

soda pop / soft drinks, or any other drinks that have been made by mixing tap water with something else. You should not buy bottled grape juice because during processing, the chlorine in the tap water destroyed many phytonutrients. The damage cannot be reversed.

Short list again:

Avoid: specific meat, cheese, milk, cream, ice cream, sodas and anything carbonated, bread and anything made with flour - cereal, pasta, crackers, cake, pies, cookies, bagels, pitas, wraps, muffins - popcorn, energy bars, rice, ALL COOKED FOOD - including steamed, sauteed, fried, boiled, baked - all commercial candy and chocolate, coffee, chips, and all processed food.

Stop smoking.

Stop drinking alcohol.

Stop drinking coffee.

Cancer diets help the immune system beat the cancer (the only thing that does) AND are well proven, Jerry Burnetti, Gerson, Budwig, Kelly, Don Tolman, Bernadette Bohan PLUS MANY MORE HAVE PROVEN THIS FACT.

New cancer beating diets are appearing all the time, Panacea is involved in collecting these records and educating the public, we intend to do this on donation can you help us?

Donations are needed there will be a rise in cancer due to the disaster in Japan: The cancer industry thieves because of lack of PUBLIC a education on cancer, Panacea is involved in presenting this RE-education, we also intend to provide a video and PDF to show how people who use these cures can obtain and submit proof to expose the industry for what it is, w need to publicly show the therapeutic capacity of these cures. Mean time [FDA Set to Ban Your Supplements](#) this will come to all countries soon.

The FDA (Food and Drug Administration) has approved hundreds, possibly thousands, of DRUGS that can KILL and MAIM a person, including horrific poisons like chemotherapy drugs, endorsing them as SAFE and EFFECTIVE, even though they have Black Box Warnings in the PDR (Physician's Desk Reference – the "bible" of Drugs for Doctors).

You can blame them for this recent unfortunate and PREVENTABLE event.

MEDICAL INCOMPETENCE KILLED STEVE JOBS

Dear Panacea, It is as simple as that: One of the most brilliant minds of our century made a fatal mistake when choosing his doctor -- Dean Ornish, MD.

Ornish, infamous for pushing heavy grain consumption and soy on his patients, and denying them healthful fats, has been thoroughly discredited for decades. The evidence is conclusive: heavy grain consumption causes hypertrophy of the pancreas, as well as severe tissue degeneration, and can lead to the pancreatic cancer that brought Jobs down at the age of 56. And soy, as all my readers know, is deadly for the thyroid gland.

Don't let the Ornish diet bring you down, too, and please help others by forwarding this warning to your contacts. For free information on the dangers of grains, [click here](#) to read AGAINST THE GRAIN, Chapter 16 of my book, TAKE CONTROL OF YOUR HEALTH AND ESCAPE THE SICKNESS INDUSTRY.

Medical THC cancer cures are proven FAR beyond any RESEARCH study; you would not know it but the following THC medical study reference contains nearly 100 [NON TOXIC SUCCESSFUL RESULTS OF THC CURING DIESEASE](#). The FDA and other medical policing bodies will not let PUBLIC ACCESS to THC non toxic treatments, maybe in 15 years after many court cases, despite its non toxic history.

THC cures are being held back by the “CORRUPTION involved in the Pharma’s drug strong hold”, but not by one of our most respected workers in the field which we will call Harley at this time. There have been many trials to show that THC is especially effective for Glioma (non operable) brain cancer patients and will reduce their tumor in a non toxic way, but why wait for the FDA and other corrupt industries to stop you from doing it. The following formula is ONE easy way to get the medicinal values of THC. Harley open sourced this, and we love him for it.

Obtain a hand held wheatgrass juicer. Juice the leaf OR flowers of the cannabis plant. Give one oz of **cannabis juice**. (<http://www.convertunits.com/from/US+fluid+ounce/to/ml>) mixed with apple juice or carrot or in a whole food mixer. Mix the apple or carrots separately before adding to the Medical THC juice. The Leaf is fine buds work also. **One Oz of this Juice 3-5 times a day, this way the medical THC has CBDA and THCA up to 400 times the medicinal typical CBD and THC.**

CBDA and THCA up to 400 times the medicinal typical CBD and THC

1 US Fluid Ounce = 29.5735296 Milliliters. Panacea operates on limited donations and is the only body intent on educating the public beyond what patients can do. There is much more that Panacea will be demonstrating and presenting in our up and coming alternative cancer cure PDF, video and diet video. We will also be offering coaching to help. **We will also be training people to get medical records to break the frauds involved in oncology.**

Panacea is presently authoring a comprehensive **FREE** online course on alternative and suppressed cancer treatments. **Due to the large volume of neglected treatments and suppression involved, Panacea has decided to additionally produce a video documentary outlining our own stratagem to deal with this continued educational problem.**

Your help kills the frauds, we will do our best on the budget we have (none). We are only just begging to find out about these remarkable properties due to limited cases appearing by chance. THIS "PROGRESS" REMAINS UNDER CAPACITY TO SAVE LIVES - progress which could be far greater. We cannot expect real time progress when people can only find out about these cures through word of mouth or internet alone. So far unless you're living in Mexico, practically all patients can only access this information if you happen to have searched for it on the internet or if someone previously has heard of them and happens to inform you about them. It is obvious that this is limiting this knowledge from public access.

This needs to be addressed by a selected group of volunteer nonprofit doctors who can work specifically to collect further medical proof of these natural alternative cures. Then the public need INFRASTRUCTURE specific for policed education and future SECURITY.

This educational clinic and institute can only function with a policing body that is evidence based, independent, non aligned and NON Profit. This means that the doctors, medical recordings, study

and any peer review can have NO connection to any outside financial interests or can be linked with any possible vested interests. There are enough "non -profit" doctors in existence that could be both sponsored and selected for this task.

There is more than enough money given for cancer "cures" to charities to put it mildly. Today there are enough of these successful alternative cancer treatment records present to be evaluated for assured success. This public disclosure can make the biggest impact to cancer change in human history. Today records state that 1 in 3 woman and 1 in 2 men will get cancer, these figures are not improving. **Do you think that soon 1 on 1 won't get cancer if no change is made?** As you research the sheer number of cure cases presented, there can be no doubt that these cases prove that the time is now perfect to bring this suppression issue into the public eye. The biggest impact can now be made.

A Suppressed cancer prevention and treatment – Vitamin B17

It has taken years for these ALTERNATIVE CANCER CURE records to be acquired for this moment. Once this policing body is publicly announced, sponsored and selected, there are enough alternative cancer cure clinics present in the world (currently Mexico) with the capacity to administer the bulk of the education on these treatments. They can also provide the critically needed STUDY environment to PROGRESS further. We could save many lives from this information. The policing body is intended to independently access the sheer amount of medical records and alternative cures, plus provide new independent proof and record further required data. Then with the PUBLIC awareness of all these factors the medical industry will have to follow suit and the suppression can be finally quelled. This cancer suppression dates back to the 30's and continues today. Panacea's task is to collect this body of doctors and change OUR CHILDRENS history. Can you help or are you a doctor who can contribute? [Contact us.](#)

The Panacea alternative cancer treatment resource course cannot be underestimated. Raw whole food nutrition EDUCATION will remain non mainstream otherwise, any donations will do a world of good and help us show OPEN SOURCE solutions which prove that the majority of the toxic pharmaceutical drugs are not needed. **People must know that they have a cheap and easy way to improve their health, and that pills do not cure but whole food is prevention in the true sense.**

Everything you need to get **started** to improve your health and PREVENT DISEASE, can be found on our [Organic raw food nutrition page](#). Panacea has begun filming a complete menu resource with

many examples to help educate others. **When completed, this will be the largest open source nutrition project to prevent disease that's ever been undertaken. We will work the hardest to complete this with on no budget.**

Z5 fuel savers testimonials underway to help erect a tax deduction for fuel savers

Z5 Fuel savers obtained by Panacea for public health

Panacea has begun an extensive research effort in order to help the public and businesses obtain a tax deduction on working fuel savers, so far so good and we can report the world's first success with a diesel truck driver who successfully applied for a tax deduction using the easy and proven low cost modification we advised to trial. The diesel truck driver in question obtained an extra 100 K's out of his tank. He fills up now 2 times instead of three. This is great for public health and his business. Panacea has all this on video and will publish soon.

Receipt / Invoice

All prices included taxes

If you can prove that your purchase of any fuel saver is an investment in your business, (which most are) then please contact us and obtain a low cost mod, we can help. Even open source mods can be claimed. We will also be showing emissions test to pressure politicians to accept that a tax deduction for every member of the public will result in reward and create a new standard in public health

Panacea has been collecting emissions and fuel saving results using the open source and non open source hydrogen gas splitters, Z5's and [Xtreme Fuel Treatments](#) from many volunteers; we have at

least 10 volunteers so far returning Z5, hydrogen gas splitting and XFT data back to us in order for us to make the case that pollution reeducation is instant using these lost cost modifications and people should be given an incentive to use them via tax deduction.

Here are 2 new Panacea productions to prove our results.

[Panacea's Z5 & Xtreme Fuel Treatment Test Results](#)

[Panacea Z5 Test Results](#)

The world's biggest [Panacea] whole food organic and raw food resource is 10% complete. We have been filming NON STOP! You will soon have the most recipes POSSIBLE, plus all the related whole food and natural medicine attached to these foods (never been done) in one resource, the DVD will be donation only but the info will be yours on you the free ON NO BUDGET, we are doing this on no donations at this time but new care so whatever it takes. How else can we continue?

Panacea will be creating the public's own (with mirror and back up) YouTube channel to upgrade our raw/organic/whole food medicine production and PDF to help all schools, from meat eaters to vegetarians to raw and organic whole food people. We have to make it palatable WITH what they ALL eat to improve public health and stop Big Pharma drugs and their industry.

Getting there, one of Panacea's food dehydrators purchased by your Panacea Trustee's for your productions

Updated new [alternative medicine page](#). We need our own research center for public access with a training program to show how we can bypass the FDA and others with natural remedies.

[Corporate elite determine the food we eat?](#)

There will never be any financial incentive to prevent disease, we have to create our own educational institute to take responsibility for our health –This includes easily accessible and cheap education on what to eat and why. Panacea is currently constructing this, we don't know anyone else doing this, and we can say that your help counts, if you do not decide to help, regardless we will try.

Technical - Panacea University News

Update - Panacea's investigation into the Steorn technology

[Irish company Steorn](#) is still blowing “hot air”, however this time it's not in the form of their free energy claims but with steam coming from their alleged working heater. Panacea has been extensively sponsored by our most respected trustee “Rolf” to help bring you our Steorn reports; we have begun their heater replication process.

Panacea's ongoing tuning and calorimetric testing of the Steorn heater principle

For over a year now Panacea has been investigating and trying to replicate Steorn's free energy claims, we join the rest of the developers in their forum currently struggling to get "juice" out of their principles.

Steorn's report of their principle working in a heating application has sparked new interests in their developer forum for license holders to continue R & D, this is what Panacea is committed to also. The screenshot below is taken from the Video Sean M (CEO of Steorn) put up describing a heater operating from their free energy principle.

Steorn heater Video scene

Here is a quote taken from a [Peswiki report](#)

"The basic parameters are a 1kW input, the flow rate of water is oscillates between 8 and 14 L per minute, and the output (as seen) is steam, the input temp of the water is approx 20-25 degrees C. It would be pretty simple for someone to do the [math](#) on this." -- Shaun McCarthy, CEO, Steorn (October 05, 2011 12:52 PM MST) "

In the [Peswiki report](#) , the math submitted stated that this efficiency is around 40x excess energy. The [Peswiki report](#) also described the following:

The extra heating effect under the application of an AC signal is not explained simply by the transfer of input power to the coil. Consideration of the energy input to the system does not account for the energy output -- as evidenced by the steady state temperature; there is an extra effect which needs to be isolated and identified.

Steorn is still an intellectual property company; this time they did their own developer R & D and are not telling others how they did their latest heater.

What a waste of time and rip off to developers. This has meant that over the years they have performed measurement demos and scope shots of very small power output capacities. They have never driven something doing real work for the home. These validation reports have left a lot of

scrutiny from various people. Replicators on their forum have nothing to show and they have spent the money with no practical correction resulting from Steorn technical support.

It seems now that the only way to really get to the bottom of this is to produce a home power application.

Panacea's ongoing tuning and caloric meter testing of the Steorn heater principle

We are in the middle of attempting to replicate their home power heater, so far our results show under unity, but we are far from completely understanding their principle at this time and need to do more tuning and experimentation, below is our preliminary Excel file results of electricity to heat COP.

DC	Temperature °C	Voltage (V)	Current (A)	Input power (W)	Output power (W)	Efficiency (%)	COP

Panacea's ongoing tuning and caloric meter testing of the Steorn heater principle

Update on Panacea's Orgone research

Panacea is still honoring Trevor James constable's clean, [non chemical weather engineering technology](#) which was donated to us. Trevor is in his 80's and not in the best of health these days. TJC, like Reich, has superior technology and higher education. We have to work together and be intent on educating the world on etheric or orgone weather engineering. Panacea's testing is still going, we have new equipment and new ideas to help get this technology working and help farmers and drought stricken countries. Here are some recent testing photos:

Water ERE runs

New Airborne Tubes donated to Panacea for research

With funds/help we can get to the bottom of this, think of the result, more flights are needed, below are some photos of some initial test runs to help farmers with drought.

Trustee Andrew Gardiner commencing Panacea's test flight
–Airborne tube is pictured next to Andrew on the right

Close up of an airborne tube

Open source- Bill Williams GSC hydrogen gas splitter cell

[Bill Williams GSC hydrogen gas splitter cell](#) and is under construction, we regret that we don't have it done yet but are working on it, Bills' GSC is the world's first open source hydrogen gas splitter. Hang in there our dear friend, we will get done it as soon as we can.

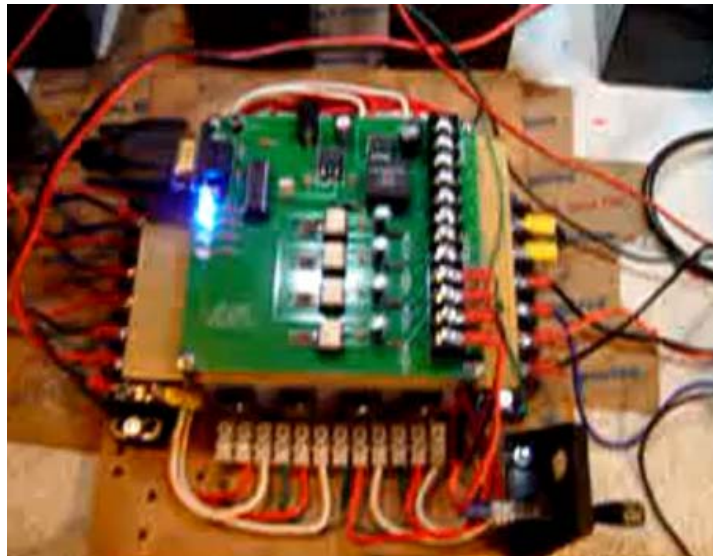

We have already seen successful gas splitting hydrogen reduce emissions and improve economy, this can be seen in our first test with [DR D's donated cells](#), and now [Reg's and Peter's cell from HHO RESEARCH](#). The advantage in using hydrogen splitting is low amps and good savings and cleaning out carbon deposits and saving fuel.

Bill, Reg , Peter and Dr D have all helped each other. **We are very proud of them.** Panacea is testing another dry cell version donated to us from HHO-Research and hope to have some reports soon, along with an Alternative Medicine course coming with our own volunteers.

Open source Free energy review and credits

Open source engineers Matt and Jeff are on the trail of the Tesla switch, we can only watch in awe and try and do our part, if you can support them in any way please do, we hope to have some research PDF from Matt and Jeff for you all soon. Matt and Jeff can be found on the energetic forum.

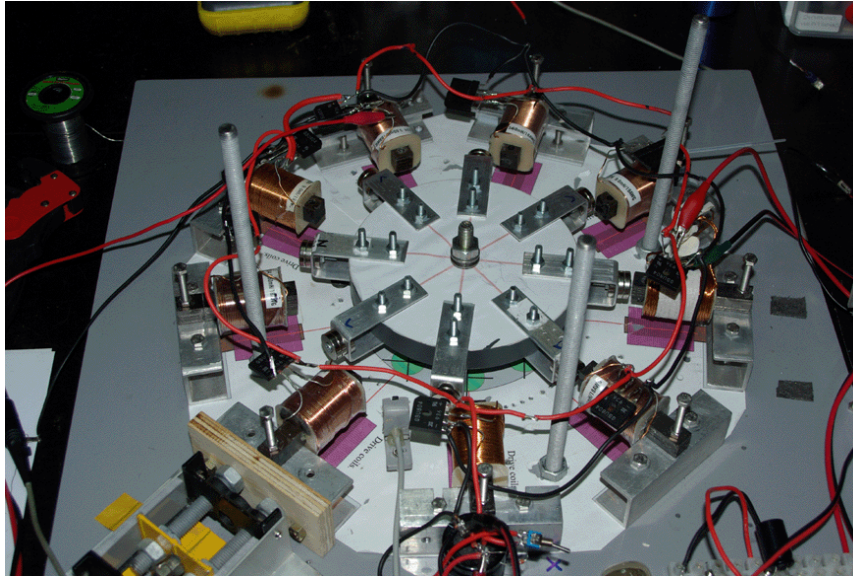

[Matt Jones replicated Tesla Switch.](#)

Dr Stiffler has been showing very promising results with his passive SEC exciter. Panacea will also be replicating this and reporting in the next newsletter. Ron does well to explain and show that the SEC exciter is something else and not RF energy.

[SEC -Science Project](#)

It is not widely known but [Rod Wells](#) is HONEST and a respected Panacea champion of open source and has done a great service to our community. Rodney wells has helped Panacea a number of times and continues to work for you on his own budget and help our community.

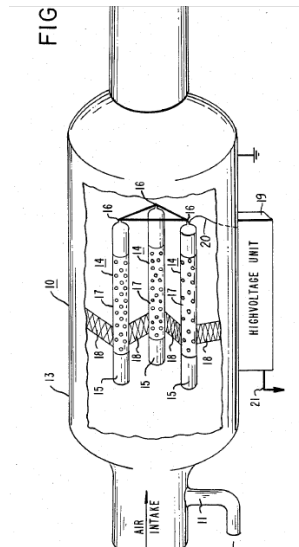

One of Rod's many donations to public education

Rod has been instrumental in trying to crack the claims originally made by “RomeroUK”, whose over unity claim surfaced a while ago and has since motivated many open source engineers to begin the replication process. At the very least they learned from their trials and errors and have all advanced our collective knowledge, no success resulted yet - it could have been a hoax. But we still made progress; regardless.

Rod is one of the few we can trust to replicate these “type of projects” and one of the few who has been able to report and learn in order to help educate others. Panacea contributed only a small amount to Rod's Romero project, there is no doubt that he should be supported and that we can help him in the future to give us open source TRUTH towards FREE energy.

Panacea conducts R & D into an air ionizing fuel saving device based on United States Patent US4519357

[United States Patent US4519357](#) details a method to save fuel, and we want to explore this for YOU. Results will be open source. After the success with the Z5(also an air ionizing device) we must help each other in donations or R & D time to look for public domain information.

Panacea SPAD production

The SPAD (peripheral system for dynamic amelioration) is a virtually unknown and neglected open source fuel saving and pollution cutting modification. The SPAD has been saving fuel in MANY diesel tractors and in agricultural machinery in France for over 10 years.

The SPAD is a water fed kit, the water vapors are fed through a heat exchanging reactor and "steam reformed" to produce hydrogen rich gases. These are fed into the air intake and the governor is then is tuned to improve economy and reduce pollution. Some tuning of the governor will be required. The plans are completely open source and are available on the Panacea University website.

Who is intent on training the rest of the world? Who else is making the pollution reduction case to help farmers get a tax deduction and help clean up their pollution and save their fuel? No one that we know of, this is why Panacea exists and survives only by your donations and volunteer work.

Panacea SPAD Production

With the carbon tax proposed, this SPAD solution is far more practical and can produce practical pollution reduction results over any proposed carbon tax. Farmers need subsidies and endorsements to implement SPAD to relieve their economic burden and pollution. Proven technologies like the SPAD, Z5 and XFT are the only ones that can do it SAFELY and TODAY. Taxing the farmer won't solve the pollution problem or can compare with this real time fuel saving and pollution reduction technology.

There is a vast dissemination of the open source SPAD variant technology in France, **this has ONLY happened as a result of open source engineers working together to teach free information.** The open source community works daily on no budget improving what we have. Improvements have certainly resulted in the case of the SPAD technology in France. If western countries had widespread implementation of this variant technology in their diesel engines not only could they save a lot of fuel and money, but reduce their emissions and reduce cancer. New Zealand, Australia, and America are at present producing the most pollution.

Despite this problem the open source SPAD variant remains unknown to the majority of the general public. This method is not taught at any mainstream faculty, **So far Panacea's engineers are the only ones intent on training others in as much capacity as a public service.**

We are looking for engineers in India to help us clean up their 2,800,000 (two million eight hundred thousand) tractors. Yes you read right, [India has two million eight hundred thousand tractors](#). Can you imagine the pollution REDUCTION using the SPAD!? –[Contact us](#) if you can help. We will continue to help train people on our limited budget, every donation helps.

Panacea's Final report on the GEET

The short answer is that Panacea has not been able to find any reliable GEETS working in cars or small generators THAT CAN BE REPLICATED easily. Based on this we feel that people are paying a RIDICULOUS amount of money with the FALSE impression that they can replicate the GEET easily, **this is not the case.** Our most respected Trustee Rolf put up a lot of money to bring all this report, thanks to Rolf we can now put this issue to bed. David Pantone (inventor Paul Pantone's son) was flown to Panacea's headquarters In Australia to help us replicate the GEET and to evaluate whether a GEET school was practical. We decided that unless we could replicate the GEET easily and effectively, a school was out of the question. David and Paul agreed that a working GEET means we have that answer.

David Pantone A scene from our R & D

Sadly after 9 months of failures using both Paul's and David's advice plus even our own R & D (special thanks to our Trustee Allan for his dedication), **Panacea has decided that it is immoral for us to take money for GEET training and will not be starting the GEET School.** Do not let this discourage you from trying; but we think it's impossible at this time to replicate universally. This is merely our experience for what it's worth. **There are many other [reliable and cheaper ways to save fuel.](#)** Also in this report we have found a way to salvage and power failed any GEET genets economically, by using a CHEAP methane digest. We wish to give our full respect to David and Paul for trying.

However for us the difficulty level of the GEET is not transparent, either are the ideas of Paul Pantone which Panacea and many others have found to be completely "random" and not in line with any verifiable or consistent replication capacity. You are basically paying to trial Pantone ideas and do their R & D. None of it is consistent.

Trustee's Allan and Andrew - 9 months of working on the GEET

Panacea attempted to get a car and a modified carby to work and run genset(s) at factory. No luck. The GEET remains R & D but how viable is it really compared to what's out there to save fuel? **Well we must state IF one would entertain buying such a GEET course/dealership one should want to know what they were buying. Since Panacea is in a position to know the curricular and people who have been to the class we can state that transparency is needed for people who want to go there.**

The dealership capacity and difficulty level involved plus what your buying needs to be BETTER understood. Plus people don't know that the GEET bubbler demos are not a genset working at factory capacity (or can ever be). Convert a genset with a GEET bubbler demo like David did here <http://www.youtube.com/watch?v=jBBWqChtquw> (A lot of people doing sadly)

And basically:

1) The Bubbler is acting as the carby, so you have to manually adjust it UNDER LOAD, which can cause over revving of the engine, it changes the air fuel ratio (More air goes into the bubbler as the fuel vapors go down). Hence you cannot FULLY LOAD IT at FACTORY. However we see genset after genset ruined (we have even done this)

2) There will be no pollution using VAPORS WITH NO LOAD as shown the paper towel demos, sadly it can't run anything with the bubbler THAT WAY you would have to stand there and adjust knobs all day.

The bubbler has never been run so all the "junk" goes down under load and would it even? Try it is our advice-We have, impossible and looks like a fraud. There is more than fuel vapors left, there is JUNK too. Hence why we stated to Paul Pantone in the next demos try and retro fit it with a MODIFIED CARBURETOR UNDER FULL LOAD AND MEASURE THE POLLUTION.

This way:

- 1) You can get calibrated pollution results
- 2) get full HP out of the engine
- 3) run it at factory and not waste the engine
- 4) transparency of the system's CAPACITY is shown

We have also been informed that the GEET Tesla Tech plans are out of date, the new ideas didn't fair either sadly, as long as people know they are going to PAY to get R & D ideas on supplemental carburetors or diesel systems to help with the idle /power UNSOLVED PROBLEM AND THEY HAVE TO EXPERIMENT WITH THAT, then there would be transparency in the GEET "school;". If they looked at what the open source vortex heat exchanger group have done they would realize what's involved and the difficulty.

For a lot of people paying for dealerships and the School, as long as this element is understood, then we don't think Paul pantone can pull the wool over anyone's eyes. **The real research is being done in the Vortex Heat Exchanger group and is brilliantly managed by open source engineer Naresh. However no one gets anything there from Paul Pantone but deserves it.**

Check there before paying for the GEET School, the info is the same as far as we know. Many (and they should) believe in fuel reforming, hopefully any PP GEET failures or over priced misunderstood PP courses do not distract from this. The VHE is about open source fuel reforming.

The Panacea GEET document is thus pulled from the website; we will be making a steam reforming open source document soon. Thank you to our contributors who helped get Paul pantone out of the clink, however, we find him to be untrustworthy at this time and unnecessarily pulling the wool over many people's eyes. Thankfully, we can report the truth. This brings us to:

Methane Digest Ideas

Biogas typically refers to a gas produced by the biological breakdown of organic matter in the absence of oxygen. Comprised primarily of methane and carbon dioxide, biogas originates from biogenic material and is a type of biofuel. It's a product of the anaerobic digestion or fermentation of biodegradable materials such as manure or sewage.

This solution is to Panacea, second only to using industrial hemp in a gasifier for cheap and renewable energy, Hemp also has other benefits, and so does methane digesters.

Utilizing biogas to generate electricity is one of the most comprehensive solutions for waste treatment and energy decentralization. A cheap bio gas digest is one of the overlooked free energy sources today; most of [Vietnam's remote villages](#) use methane. There are many [others in India converting waste to energy](#).

Yes it's you know who shaking hands
with an India Bio gas producer

Is a 10Kw home power system possible on the cheap? We think YES. Kitchen scraps or lawn clippings can produce fertilizer and produce power for small gensets, heating and others.

Home Methane digest –FREE energy and fertilizer

[The following video](#) shows how to build a homemade anaerobic digester for making biogas. This is made of a 55 gallon drum, valves, and PVC sewer pipe. The cost is around 75 dollars. This is the cheapest way we know to makes great fertilizer and methane gas which can be captured for use in small engines, heaters, and lamps. You can make an even [smaller and simpler Homemade Biogas Generator](#)

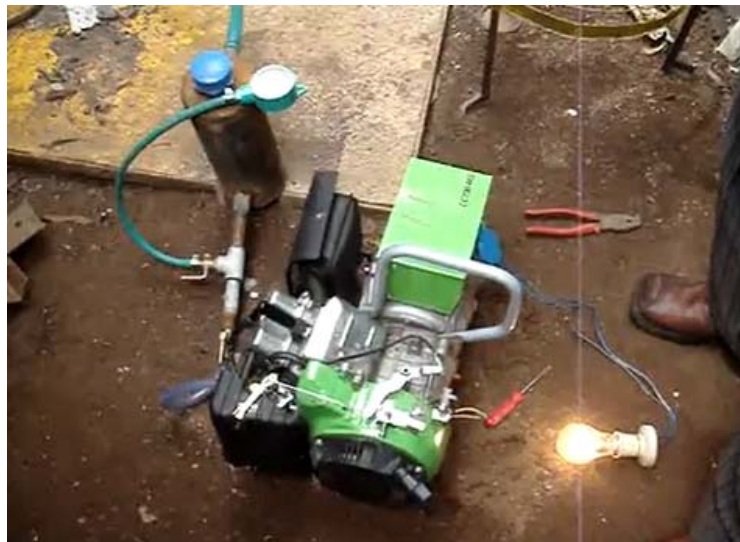

This cheap and small set up makes for a great emergency light or heating element, you could also power a small genset to charge batteries.

Note-, it is recommended that do not use human waste until you check if human waste generates hydrogen sulfide, which may damage engines. You can even make a cheap [Biogas community power project](#) .

Start here -[Animation of a simple telescoping biogas digester](#):.
[Biogas from a small digester runs Stirling engine](#)

Therefore anyone with an old non working GEET genset, has a perfect candidate for methane power. Small gensets run very well on home methane. We are currently trying to find a 5-10Kw home methane digest system design to publish at the Panacea University.

kitchen-waste-produced-biogas on our porch.

Always Refresh the Pages on the BOCAF site

Please always refresh the pages (by pressing the f5 key) when visiting the panacea site, unfortunate mistakes due to time constraints and understaffing are being corrected and new content is being added. Please contact us if you see any mistakes - we appreciate any help and feedback.

Some of our new courses and categories pending include “Alternative medicine”, Permaculture, Hemp production, RAW food organic nutrition and economics. All of this combined subject matter is required to give you SELF SUFFICIENCY and sustainability. However this education is not policed, secure or even covered in any other faculty. **We are doing this on NO BUDGET. With more donations we can do more.**

We wish to extend our sincere gratitude and thanks to all our new and current subscribers. We are grateful for all of your NEEDED support.

You are the only ones who are helping to achieve the objectives we have reported in this newsletter. Panacea’s achievements are our own for a simple reason; only at the grass roots level can we achieve what no other organization has done.

Sadly we cannot survive on a shoe string budget. However no matter how small or slight you think your donation is, without it; we won’t be able to continue to help. We must work together to stop subjugation, only collectively we can we reap OUR rewards.

Panacea needs you and donations or help!

If you can assist us in any way, shape, or form, [please donate](#).

The proceeds derived from materials offered to the non profit organization are carefully utilized toward various projects to bring about a better future for all. Please help us deliver suppressed and alternative free energy technologies to the public by making a donation.

There are many ways to render assistance towards the reaching of the goals of Panacea-BOCAF. You may, for instance, contribute any ideas or input - let us know of a new website or a replicable project or any such thing. You can also become a volunteer or even offer a donation. For those of you who are not able to use PayPal, it is possible to assist the foundation by mailing any form of assistance to the following address:

Care of Panacea-BOCAF
150 Lytton RD East Brisbane QLD 4169
Australia

www.panacea-bocaf.org/pleasedonate.htm

If you are involved in or can help with any of the subject matter presented on [our projects page](#), please contact us for collaborative work. Only united can we all work effectively to stop subjugation. Also we are helping make real changes by [public activism](#). **Please sign our petitions; it’s as easy as name, email, and country.**

A reminder for Security

To all our new subscribers- It is Important note that should your news letter not show up and / or the Panacea web site ever be taken down, or anything suspicious like a non response from the nonprofit organization ever occurs - Please email from the link below (save this link). Along with the following text template provided. **Please email the Panacea web site BEFORE hand to double check.**

[Queensland Police headquarters.](#)

Police Headquarters
Queensland Police Service
200 Roma Street

Telephone: (07) 3364 6464 (TTY - (07) 3364 4655)
Facsimile: (07) 3236 2359

GPO Box 1440
BRISBANE QLD 4001

Queensland Police Service Internet Web Site - <http://www.police.qld.gov.au>

Hello, I am a news letter subscriber of a nonprofit organization at Panacea-bocaf.org. I am sending this email in order to inform you that the nonprofit organization which is engaged in research and development into alternative and suppressed FREE energy technology may have been targeted and or intimidated. Their news letter has not turned up and or there is no response from their web site. As a news letter subscriber this email has been sent as a precaution, I am acting as a deterrent and as a "watch dog" of their operations. Newsletter subscribers have been informed that the nonprofit organization has visited your police station to go on record detailing that they are perusing this research and further that intimidation or interference may possibly occur. Plus they have reported that previous intimidation has occurred to their registered engineers. Therefore we the news letter subscribers are advised that if anything suspicious arises, for the news letter subscriber to send you this concerned email. Please look into the situation immediately. Regards....

[Send the Email to this link below - Save this link!](#)

<http://www.police.qld.gov.au/Forms/contact.asp>

We are happy to report that no suspicious behavior has happened to your nonprofit organization or to any of our open source engineers despite us being involved in this genre of research that threatens the "status quo". The Panacea's trustees would like to personally congratulate you for playing a continued successful security role with your news letter subscription. **Thank you for your critically needed support!** – We look forward to reporting to you in the next newsletter **which is due sometime in March 2012.**

Please check our [news section](#) on the Panacea-BOCAF site for new video productions coming soon. The nonprofit organization's volunteers are proud to work for the public and look forward to reporting our public service to you soon! **Thank you again for your subscription.**

Sincerely, The trustee's of Panacea-BOCAF.
